

Contents

Overview	vii
Keynote Address	
Space Exploration and Fire Technology at Southwest Research Institute—Learning from the Past and Preparing for the Future	000
Walter D. Downing	
Test Methods	
A Method for Autogenous Ignition Temperature Determination of Metal Through Induction Heating	000
Joel Stoltzfus and Timothy D. Gallus	
Statistical Considerations for Adiabatic Compression Testing	000
Barry E. Newton and Theodore A. Steinberg	
Improved ASTM G72 Test Method for Ensuring Adequate Fuel-to-Oxidizer Ratios	000
Alfredo Juarez and Susana A. Harper	
Autogenous Ignition Test Approach for Hyperbaric Oxygen (HBO₂) and Other Low-Pressure Oxygen Applications	000
Gwenael J. Chifoleau, Richard Barry, Barry E. Newton, Nicholas Linley	
Cleaning and Contamination Control	
Results of the Test Program for Replacement of AK-225G Solvent for Cleaning NASA Propulsion Oxygen Systems	000
Nikki M. Lowrey and Mark A. Mitchell	
NASA Independent Assessment of Ambient Pressure Liquid Oxygen (LOX) Impact Testing of Halogenated Solvents	000
H. R. Ross and S. J. Gentz	

An Improved Approach for Analyzing the Oxygen Compatibility of Solvents and Other Oxygen-Flammable Materials for Use in Oxygen Systems	000
Susana A. Harper, Alfredo Juarez, Stephen F. Peralta, Joel Stoltzfus, Christina Piña Arpin, and Harold D. Beeson	
Analysis of Risks to Oxygen Systems from Particulate and Fiber Contaminants and Derivation of Cleanliness Requirements	000
Nikki M. Lowrey	
Factors Affecting NVR Contaminant Fire Risk	000
Bradley S. Forsyth, Gwenael J. A. Chifoleau, Barry E. Newton	
Failure and Incident Investigations	
Fatal Accident from Oxygen Fire in Indian Steel Plant in 2012: Unresolved Questions	000
Kanchan Chowdhury	
Auto Ignition Temperature Test Chamber Fire Investigation	000
Jonathan M. Tylka and Timothy D. Gallus	
Investigation of a Fire in a Liquid Oxygen Bulk Delivery Tank	000
Barry E. Newton and John Schumacher	
Failure Analysis of a Liquid Oxygen Gate Valve Fire	000
Gwenael J. A. Chifoleau, Elliot T. Forsyth, and Barry E. Newton	
Stainless Steel Plug Valve Incident in High Pressure Oxygen: Delrin® Seat and Silicone-Based Lubricant	000
Jared D. Hooser, Bradley S. Forsyth, Gwenael J.A. Chifoleau, and Barry E. Newton	
Research on Materials and Operations	
Properties of ToughMet® 3 Copper-Nickel-Tin Alloy for Oxygen Enriched Atmosphere Applications	000
Anand V. Samant, Michael J. Gedeon, Robert E. Kusner, Chad A. Finkbeiner, Fritz C. Gensing, and W. Raymond Cribb	
Detailed Investigation of the Sequence of Mechanisms Participating in Metals Ignition in Oxygen Using Laser Heating and In Situ, Real-Time Diagnostics	000
Maryse Muller, Hazem El-Rabii, Rémy Fabbro, Frédéric Coste, Jean-Christophe Rostaing, Martina Ridlova, Alain Colson, and Hervé Barthélémy	
Comparison of Combustion Products of Bulk Aluminum Rods Burning in High Pressure Oxygen in Normal and Reduced Gravity	000
Owen Plagens and Theodore A. Steinberg	
Simulation of Cylindrical Rod Combustion in High-Pressure Oxygen by Steady-State Jet Model	000
S. I. Shabunya, V. V. Martynenko, V. I. Ignatenko, and J.-C. Rostaing	

Evaluation of Containment Boxes as a Fire Mitigation Method in Elevated Oxygen Conditions	000
Alfredo Juarez, Susana A. Harper, Horacio Perez	
Promoted Ignition-Combustion Tests of Brazed Aluminum Heat Exchanger Samples in Cold Supercritical Oxygen	000
Thomas A. McNamara, Joseph F. Million, Ravi Pahade, and James White	
Oxygen Endurance Testing of Oxygen Cylinder Valves	000
T. Kasch, Chr. Binder, N. Treisch, M. Szykowski, and A. Woitzek	
Evaluation of a Near-Adiabatic Compression Process to Increase Fire Safety Within Oxygen Systems, Focusing on Non-Metals	000
Maria Ryan, Theodore A. Steinberg, and Barry E. Newton	
Oxygen Partial Pressure and Oxygen Concentration Flammability: Can They Be Correlated?	000
Susana A. Harper, Alfredo Juarez, Horacio Perez III, David B. Hirsch, and Harold D. Beeson
