Installation Instructions for CHETAH 9.0 on the Vista Operating System

You must follow the procedure indicated below to get CHETAH 9.0 to work on Vista.

First install CHETAH using the normal installation program on the CD furnished. After that is completed successfully, follow the additional steps below. This process only has to be completed one time to complete the installation of CHETAH 9.0. It does not have to be repeated each time CHETAH 9.0 is used.

We are going to use the Program Compatibility wizard to change the compatibility settings for the program. There are 2 ways for doing this.

1. First technique (simple way)

To change the compatibility settings manually, right-click the CHETAH icon installed during the installation on the desktop, click Properties in the dialog box that appears.

A Properties dialog box now appears as shown following. Click the Compatibility tab. In the compatibility tab choose Microsoft Windows XP (Service Pack 2) and click Apply and then the Ok button. Note that you should also choose to run the program as an administrator. The new settings for CHETAH 9.0 will be saved. You are now finished installing CHETAH 9.0 for Vista.
If you have problems with this program and it worked correctly on an earlier version of Windows, select the compatibility mode that matches that earlier version.

Compatibility mode
- Run this program in compatibility mode for:
  - Windows XP (Service Pack 2)

Settings
- Run in 256 colors
- Run in 640 x 480 screen resolution
- Disable visual themes
- Disable desktop composition
- Disable display scaling on high DPI settings

Privilege Level
- Run this program as an administrator

Show settings for all users
OK Cancel Apply
2. Second technique (for those that want more explanation)

Run the Program Compatibility Wizard

- You can open the Program Compatibility Wizard by clicking the Start button, then clicking Control Panel.
• Next Click the Programs icon and you will see the following:

![Programs Icon](image)

• Click **Use an older program with this version of Windows**.

Then follow the instructions on the screens as shown in the following:
Program Compatibility Wizard

Welcome to the Program Compatibility Wizard

If you are experiencing problems with a program that worked correctly on an earlier version of Windows, this wizard helps you select and test compatibility settings that may fix those problems.

Caution: It is recommended that you do not use this wizard for older virus detection, backup, or system programs.

To continue, click Next.

< Back   Next >   Cancel

Program Compatibility Wizard

How do you want to locate the program that you would like to run with compatibility settings?

- I want to choose from a list of programs
- I want to use the program in the CD-ROM drive
- I want to locate the program manually

---

< Back   Next >   Cancel
- Select CHETAH 9.0 and click **Next**.

![Program Compatibility Wizard](image_url)
• Select Microsoft Windows XP (Service Pack 2) and click Next

![Start Application in Compatibility Mode]

• Please do not change any display settings on the next page that appears. Just click the Next button.

• On the next screen you may be asked to check the “Run this program as Administrator” option. Check it and click Next button.
After this step when you click the Next button, you can either reinstall the CHETAH program or exit the setup.

The new settings will be saved. CHETAH 9.0 is now ready to be run under the Vista operating system.
