

7 Steps for Cannabis Certification

Certification for cannabis and hemp producers to help maintain good manufacturing practices and demonstrate safe handling practices of cannabis products.

01

Submit application for consideration and complete participation agreement.

07

Adhere to annual maintenance process, including sample selection (if applicable) from retail locations and quality audits.

02

Complete optional pre-audit of your facility to determine where gaps exist and improvements can be made to your quality management system.

06

Apply ASTM certification mark to your cannabis packaging and marketing materials.

Certified

03

Remit payment for participation, testing, and all audits.

05

If approved, SEI will send notice that your facility meets all specifications.

04

Conduct full quality audit of your facility and, if applicable, submit cannabis flower samples for water activity evaluation (using ASTM standards).
