ASTM International Technical Committee D11 on Rubber and Rubber-like Materials

Scope

The formulation of the test methods, definitions, specifications, practices, and classifications pertaining to rubber, rubber products, and systems and services appropriate to rubber technology. Tires, insulated wire and cable, electrical protective equipment, and insulated tape are excluded since they are the responsibility of other ASTM Committees.

The Committee shall encourage research concerning the properties of such materials, products, and systems. Both standardization and research activities will be coordinated with other relevant Committees.

Key Documents

- D2240 Standard Test Method for Rubber Property—Durometer Hardness
- D3492 Standard Specification for Rubber Contraceptives (Male Condoms)
- D3577 Standard Specification for Rubber Surgical Gloves

Technical Subcommittees

- D11.08 Terminology
- D11.10 Physical Testing
- D11.11 Chemical Analysis
- D11.12 Processability Tests
- D11.15 Degradation Tests
- D11.16 Application of Statistical Methods
- D11.16.01 LPRS Task Group
- D11.20 Compounding Materials and Procedures
- D11.20.01 Task Group on Recycled Rubber
- D11.22 Natural Rubber
- D11.23 Synthetic Rubbers
- D11.25 Rubber Adhesive Systems
- D11.30 Classification of Rubber Compounds
- D11.31 Rubber Hose and Belting
- D11.37 Coated Fabrics, Rubber Threads and Seals
- D11.40 Consumer Rubber Products
- D11.40.01 Rubber Contraceptives Task Group
- D11.40.02 Medical Gloves Task Group
- D11.40.03 Commercial Gloves Task Group
- D11.40.04 Extraction Test Methods Task Group
- D11.40.05 Rubber Products Task Group
- D11.40.06 Task Group on Non-Barrier Rubber Medical Devices

Quick Facts

Established 1912

Number of Members 350+

Number of Standards 228

Global Participation

25 Countries represented

The standards are available in

Volumes 09.01 & 09.02 in the
Annual Book of ASTM Standards

Meetings D11 meets twice each
year, in June and December
