# ASTM International Technical Committee E53 on Asset Management

## Scope

The scope of the Committee shall be: The development, maintenance and dissemination of standard practices and performance standards for asset management systems and the lifecycle management of personal property assets.

The general area of interest of the Committee will include standards to support all aspects of personal property asset management, (hereafter referred to simply as “asset” or “asset management”), including systems for the management of industrial, Federal, State, and local government personal assets, as well as educational and medical institution assets. Specific areas of interest will include all aspects of personal asset management from determination of needs and initial acquisition through final disposition, including receipt, identification and marking, record keeping, custodial and administrative accountability, reporting, consumption, maintenance, movement, storage, inventory, subcontract control, utilization, and disposition. The work of this committee will be coordinated with other ASTM committees and other organizations having mutual interest.

Note: In accordance with an agreement between the ASTM and the National Property Management Association (NPMA), ASTM develops and publishes Asset Management Standards and NPMA develops and presents educational and certification material. Copy.

## Technical Subcommittees

- E53.01 Process Management
- E53.02 Data Management
- E53.03 Financial Management
- E53.04 Reutilization and Disposal
- E53.05 Asset Leadership
- E53.06 Terminology
- E53.07 Sustainable Property Management
- E53.08 Management of Fleet Assets
- E53.10 ISO Asset Management Activity
- E53.20 United States Government Property Management
- E53.30 Decommissioning and Disposal of Medical Supplies, Medical Equipment, and Hospitals
