ASTM International Technical Committee F06 on Resilient Floor Coverings

Scope

The promotion of knowledge, the stimulation of research, the development of specifications, test methods, definitions and nomenclature, and practices for resilient floor coverings, including linoleum, vinyl, vinyl composition, asphalt, rubber, cork, and the like, in which the wearing surface is non-textile. The work of this Committee will be coordinated with other ASTM Committees and other organizations having mutual interest.

Technical Subcommittees

- F06.10 Terminology
- F06.20 Test Methods - Products Construction/Materials
- F06.30 Test Methods - Performance
- F06.40 Practices
- F06.60 Slip Resistance
- F06.80 Specifications
- F06.90 Executive
- F06.92 US TAG to ISO TC 219 on Floor Coverings

Key Documents

- F141 Standard Terminology Relating to Resilient Floor Coverings
- F710 Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring
- F1515 Standard Test Method for Measuring Light Stability of Resilient Flooring by Color Change
- F1700 Standard Specification for Solid Vinyl Floor Tile
- F2170 Standard Test Method for Determining Relative Humidity in Concrete Floor Slabs Using in situ Probes
- F3010 Standard Practice for Two-Component Resin Based Membrane-Forming Moisture Mitigation Systems for Use Under Resilient Floor Coverings

Quick Facts

- Established 1968
- Number of Members 205+
- Number of Standards 50
- The standards are available in Volume 15.04 in the Annual Book of ASTM Standards
- Meetings F06 meets twice each year, in May and November
