ASTM International Committee F40 on Declarable Substances in Materials

Scope

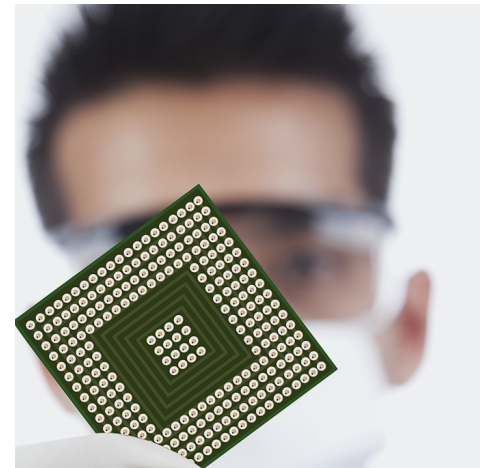

Committee F40 is responsible for development of standards for 1) the evaluation of materials and products relative to restricted hazardous substances and current and possible future substances of interest (RoHS, REACH and similar), especially as regulated by responsible authorities, and 2) the evaluation of rare earth elements in raw materials and finished products. The Committee encourages research in these fields and sponsors symposia, workshops, and publications to facilitate the development of such standards. The Committee promotes liaison with other ASTM international Committees and other organizations with mutual interests.

Technical Subcommittees

- F40.02 Management Practices and Guides
- F40.02.01 Task Group on Guides for REACH Supply Chain Management
- F40.02.02 Task Group on Guides for SVHC Testing
- F40.03 Monitoring and Research of Legislation and Regulations
- F40.90 Executive
- F40.91 Terminology

Key Documents

- F2617 Standard Test Method for Identification and Quantification of Chromium, Bromine, Cadmium, Mercury, and Lead in Polymeric Material Using Energy Dispersive X-ray Spectrometry
- F2725 Standard Test Method for Measurement of Enthalpy of Fusion, Percent Crystallinity, and Melting Point of Ultra-High-Molecular Weight Polyethylene by Means of Differential Scanning Calorimetry
- F2853 Standard Test Method for Measurement of Enthalpy of Fusion, Percent Crystallinity, and Melting Point of Ultra-High-Molecular Weight Polyethylene by Means of Differential Scanning Calorimetry

Quick Facts

Established 2005

Number of Members 130+

Number of Standards 9

Global Participation

11 Countries represented

The standards are available in

Volume 10.04 in the *Annual*

Book of ASTM Standards

Meetings F40 meets twice each year, in April and November

Staff Manager

Brian Milewski
