Composite mechanics: ICAN: integrated composite analyzer (Murthy), Spring, 8

Composite processes: Composite standards activities of the Society of Automotive Engineers (Johnson), Spring, 24

Compression
Additional comparisons of interlocked fabric and laminated fabric Kevlar 49/epoxy composite (Reedy and Guess), Winter, 163

Average stress-strain curves for resin matrix composites (Papirno), Fall, 107

Computer codes: ICAN: integrated composite analyzer (Murthy and Chamis), Spring, 8

Conference Reports
D-30 structures composite standards at upcoming meeting (Enright), Fall, 124
Future testing needs for metal matrix composites (Persh), 119

Spacecraft structure (Reifsnider), Summer, 62

Cryogenics: High quality organic matrix composite standards for research purposes (Kasen), Fall, 103

Diasgupata, A.: see Wang, S. S. and Dasgupta, A.

Delamination
Finite-element analysis of end-notch flexure specimens (Mall and Kochhar), Summer, 54

Influence of interface ply orientation on fatigue damage of adhesively bonded composite joints (Johnson and Mall), Spring, 3

End-notch flexure specimen: Finite-element analysis of end-notch flexure specimens (Mall and Kochhar), Summer, 54

Enright, C.: D-30 structures composite standards at upcoming meeting, Fall, 124

Epoxies laminates: Additional comparisons of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Reedy and Guess), Winter, 163

Failure criterion
Deformation and fracture of random short-fiber SMC composite under multiaxial loading (Wang and Dasgupta), Winter, 129

Survey of failure and post-failure theories of laminated fiber reinforced composites (Nahas), Winter, 138

Failure theories: Survey of failure and post-failure theories of laminated fiber reinforced composites (Nahas), Winter, 138

Fans: Fabrication and quality assurance processes for superhybrid composite fan blades (Lark and Chamis), Fall, 98

Fiber composites
Characterizing matrix resin flow in carbon fiber prepreg (Boll, Motiee, and Bascom), Summer, 48
Deformation and fracture of random short-fiber SMC composite under multiaxial loading (Wang and Dasgupta), Winter, 129

Fiber laminates: Additional comparisons of interlocked fabric and laminated fabric Kevlar 49/epoxy composites (Reedy and Guess), Winter, 163

Fiber-reinforced specimens: High quality organic matrix composite specimens for research purposes (Kasen), Fall, 103

Flexible linkages: Preliminary noise control guidelines for the design of high-speed machinery (Sharif-Bakhtiari and Thompson), Fall, 84

Fracture energy: High quality organic matrix composite specimens for research purposes (Kasen), 103

Fracture toughness: Preliminary design of cracked-lap shear specimen thickness for determination of interlaminar fracture toughness (Mangalgire and Johnson), Summer, 38

Funk, J. G. and Sykes, G. F.: The effects of radiation on the interlaminar fracture toughness of a graphite/epoxy composite, Fall, 92

G

Garber, D. P.: see O'Brien, T. K., Raju, I. S., and Garber, D. P.

Graphite/epoxy: The effects of radiation on the interlaminar fracture toughness of a graphite/epoxy composite (Funk and Sykes), Fall, 92

Graphite composites: Residual thermal and moisture influences on the strain energy release rate analysis of edge delamination (O'Brien, Raju, and Garber), Summer, 37

I

Interlaminar fracture toughness
The effects of radiation on the interlaminar fracture toughness of a graphite/epoxy composite (Funk and Sykes), Fall, 92

Finite-element analysis of end-notch flexure specimens (Mall and Kochhar), Summer, 54
