Dr. Salvatore J. Rand, an independent petroleum industry consultant, has been an ASTM International member for over thirty years. He was recently honored with ASTM’s most prestigious award, the William T. Cavanaugh Memorial Award. He was recognized for his contributions to the promotion of leadership in, and education about petroleum standards worldwide.

Rand serves on Committee D02 on Petroleum Products, Liquid Fuels, and Lubricants and several of its subcommittees. He is also a member at large of the executive subcommittee. During his tenure on D02 he has been vice chairman of the committee, the chair of Subcommittee D02.05 on Properties of Fuels, Petroleum Coke and Carbon Material, Secretary of Subcommittee D02.05 on Coal, and Reactivity, and has been particularly involved in developing standards in those areas. He has also been a member of ASTM’s Committee on Technical Committee Operations (COTCO).

Rand has been recognized with the ASTM Award of Merit in 2009, a Service Award from the ASTM Committee on Technical Committee Operations in 2008, the Louis H. Sargent Jr Award in 2006, the George V. Doyal Award of Honorary Committee D02 Membership in 2004, and the Committee D02 Sydney D. Andrews Scroll of Achievement in 2003. In 2010, Rand received the Charles B. Dudley Award for Manual 1, Significance of Tests for Petroleum Products, 9th Edition, which has become ASTM’s best selling Manual.

For many years, Rand has been teaching two ASTM training courses that he developed: Gasoline: Specifications, Testing and Technology, and Fuels Technology. He has presented these courses in many cities throughout the world, and he has also made many varied presentations globally on ASTM fuel specifications and standardization procedures.

Professionally, prior to his retirement from industry and forming his consultancy, Rand directed the Fuels Test Laboratory which analyzed both liquid and gaseous fuels, at the Texaco Research and Development Center in Bexar, New York. He provided technical information and services to Texaco installations worldwide on fuel distribution, marketing and operations, as well as laboratory inspection, auditing, and personnel training both within Texaco and external to the company. He has also been a part-time professor in the graduate school of chemistry at the University of St. Joseph.

Rand, who is the author of a number of research technical publications, is a 68-year member of the American Chemical Society, where he is a past chairman of its Mid-Hudson Section. He holds a Ph.D in Physical Chemistry and Physics from Benasque Polytechnic Institute, and a B.S. in Chemistry and Philosophy from Fordham University.

Dr. Al Verstuyft, an independent petroleum industry consultant, has been an ASTM International member for over twenty years. He is a member of D02 on Petroleum Products, Liquid Fuels, and Lubricants and several of its subcommittees, including subcommittees D02.03 on Elemental Analysis, D02.04 on Hydrocarbons and D02.05 on Quality Assurance and Statistics. He is also a member of D19 on Water and D34 on Waste.

He has been or is currently a member of the American Petroleum Industry (API) Test Methods Task Force and Environmental Monitoring Task Force, Western State Petroleum Association (WSPA) Test Methods Task Force (Petroleum Fuels), American Chemical Society (ACS) Committee on Reagent Chemicals and the California Section Chemical Olympiad Coordinator. Al was the Global Laboratory Coordinator at the Chevron Energy Technology Company in Richmond, CA. He provided petroleum and environmental analysis and chemistry consulting with expertise in using complex chemical analysis data into information for decisions.

He is recognized in petroleum and environmental laboratory business for improving technical soundness and defensibility of data and operations, as well as laboratory auditing, and personnel training both within Chevron and external to the company. He is a Visiting Research Scientist at Burner Engineering Laboratory of Sandia-Livermore National Laboratory.

With Dr. Salv Rand, Al coedited “Fuel Specifications: What They Are, Why We Have Them and How They Are Used” ASTM Manual 69 (2016). He is the author of a number of research technical publications, is a 48-year member of the American Chemical Society, where he was a past chairman of its California Section. He holds a Ph.D in Inorganic/Organometallic Chemistry from University of Nevada at Reno, and a B.S. Chemistry in Santa Clara University, and was a Postdoctoral Associate in Physical Organic Chemistry at the University of Utah.
Salvatore J. Rand, Ph.D., and Allen W. Verstuyft, Ph.D., Editors

Significance of Tests for Petroleum Products
9th Edition

ASTM Stock Number: MNL1-9TH
Foreword

THIS PUBLICATION, *Significance of Tests for Petroleum Products: 9th Edition*, was sponsored by ASTM Committee D02 on Petroleum Products and Lubricants. The editors are Salvatore J. Rand, Ph.D., Consultant, North Fort Myers, Florida, and Allen W. Verstuyft, Ph.D., Al Verstuyft Consulting, LLC, Napa, California. This is the ninth edition of Manual 1 in the ASTM International manual series.
From Sal, to Thomas, Theresa, Amanda, Sarah, Michelle, Timothy, Steven, Paul, and Lucas

From Al, to Kate, Joanne and Amy
## Contents

### Acknowledgments

ix

1. Introduction
   Salvatore J. Rand and Allen W. Verstuyft

2. Automotive Spark-Ignition Engine Fuel
   James J. Simnick

3. Ethanol and Other Fuel Oxygenates
   Kristin Moore

4. Fuels for Land and Marine Diesel Engines and for Nonaviation Gas Turbines
   John E. Chandler

5. Biodiesel
   Steve Howell

6. Aviation Fuels
   Stanford Seto and Roger Gaughan

7. Crude Oils
   Harry N. Giles

8. Sampling
   Frederick J. Passman

9. Gasoline and Diesel Fuel Additives
   Alex Kulinowski, Rick Chapman, and Al Verstuyft

10. Chromatographic Methods for Fuels, Feedstocks, and Products
    Frank P. DiSanzo

11. Spectroscopic Methods for Spark Ignition Fuels
    Daniel C. Mertens

12. Burner, Heating, and Lighting Fuels
    Victor J. Turk

    David R. Forester

14. Gaseous Fuels, Liquefied Petroleum Gases, and Light Hydrocarbons:
    Methane through Butanes, Natural Gasoline, and Light Olefins
    Andy Pickard

15. Properties of Petroleum Coke, Pitch, and Manufactured Carbon and Graphite
    Bill M. Spencer

16. White Mineral Oils
    William T. Welch

17. Lubricant Base Oils
    Aaron Mendez

---

1. Introduction

2. Automotive Spark-Ignition Engine Fuel

3. Ethanol and Other Fuel Oxygenates

4. Fuels for Land and Marine Diesel Engines and for Nonaviation Gas Turbines

5. Biodiesel

6. Aviation Fuels

7. Crude Oils

8. Sampling

9. Gasoline and Diesel Fuel Additives

10. Chromatographic Methods for Fuels, Feedstocks, and Products

11. Spectroscopic Methods for Spark Ignition Fuels

12. Burner, Heating, and Lighting Fuels

14. Gaseous Fuels, Liquefied Petroleum Gases, and Light Hydrocarbons:

15. Properties of Petroleum Coke, Pitch, and Manufactured Carbon and Graphite

16. White Mineral Oils

17. Lubricant Base Oils

This manual was brought to fruition by the combined efforts of many individuals. First and foremost, we would like to convey our sincerest appreciation to all of them, with particular accolades to the 31 authors who are all experts in their individual fields and who bring a broad spectrum of interests, experience, and knowledge of the testing of petroleum products to this manual. They have devoted considerable time, energy, and resources to support this publication. In addition, we are grateful to the 46 experts who reviewed the various chapters, who through their perusal of the chapters and their suggestions permitted great manuscripts to be made even greater. We would also like to particularly extend our sincerest appreciation to the publication staff of ASTM International, especially Kathy Dernoga and Monica Siperko, who have given us significant behind-the-scenes guidance and assistance from the outset of this venture. We also wish to thank Sara Welliver of J&J Editorial, LLC, in North Carolina, who was responsible for this logistically challenging project of assembling the 24 chapters and guiding the authors involved in this publication. Ms. Welliver, Mrs. Dernoga, and Mrs. Siperko were timely and extremely responsive to the continual and numerous requests of the editors. Finally, we would like to extend our sincerest appreciation to the industrial and governmental employers of all those involved in this publication. They ultimately make it possible for us to produce manuals such as this for the benefit of those who develop and use petroleum standards worldwide.
Dr. Salvatore J. Rand, an independent petroleum industry consultant, has been an ASTM International member for over thirty years. He was recently honored with ASTM’s most prestigious award, the William T. Cavanaugh Memorial Award. He was recognized for his contributions to the promotion of leadership in, and education about petroleum standards worldwide.

Rand serves on Committee D02 on Petroleum Products, Liquid Fuels, and Lubricants and several of its subcommittees. He is also a member at large of the executive subcommittee. During his tenure on D02 he has been vice chairman of the committee, the chair of Subcommittee D02.05 on Properties of Fuels, Petroleum Coke and Carbon Material; Secretary of Subcommittee D02.05 on Coir and Reactivity, and has been particularly involved in developing standards in these areas. He has also been a member of ASTM’s Committee on Technical Committee Operations (COTO).

Rand has been recognized with the ASTM Award of Merit in 2009; a Service Award from the ASTM Committee on Technical Committee Operations in 2008; the Louis B. Sargent Jr Award in 2006; the George V. Oyelt Award of Honorary Committee D02 Membership in 2004, and the Committee D02 Sydney D. Andrews Scroll of Achievement in 2003. In 2010, Rand received the Charles B. Dudley Award for Manual 1, Significance of Tests for Petroleum Products, 8th Edition, which has become ASTM’s best selling Manual.

Dr. Allen W. Verstuyft, an independent petroleum industry consultant, has been an ASTM International member for over twenty years. He is a member of D02 on Petroleum Products, Liquid Fuels, and Lubricants and several of its subcommittees, including Subcommittees D02.03 on Elemental Analysis, D02.04 on Hydrocarbons and D02.05 on Quality Assurance and Statistics. He is also a member of D19 on Water and D34 on Waste.

A life-long resident of the greater Richmond area, Allen has been involved with technical and quality assurance auditing, and personnel training both within the company and external to the company. He has served as a research assistant at the University of Virginia, a Visiting Research Scientist at Burner Engineering Laboratory of Sandia National Laboratory, a Research Engineer at the Engine Research Center at Caltech, a Visiting Research Scientist at Texaco and external to the company. He also directed the Fuels Test Laboratory which analyzed both liquid and gaseous fuels, at the Texaco Research and Development Center in Broomall, Pennsylvania. He has worked on major projects for the U.S. DOE, NASA, EPRI and external to the company. He is recognized in petroleum and environmental laboratory business for improving technical soundness and defensibility of data and interpretations, as well as laboratory auditing, and personnel training both within Texaco and external to the company. He was recently honored with ASTM’s 9th Edition Award for Manual 9, Test Methods for Petroleum Products and Fluids.

For many years, Rand has been teaching ASTM training courses that he has developed. He has presented these courses in many cities throughout the world, and he has also made many varied presentations globally on ASTM fuel specifications and standardization procedures. Professionally, prior to his retirement from industry and forming his consultancy, Rand directed the Fuels Test Laboratory which analyzed both liquid and gaseous fuels, at the Texaco Research and Development Center in Broomall, Pennsylvania. He provided technical information and services to Texaco installations worldwide on fuel distribution, marketing and operations, as well as laboratory inspector, auditing, and personnel training both within Texaco and external to the company. Rand has been recognized with the ASTM Award of Merit in 2009; a Service Award from the ASTM Committee on Technical Committee Operations in 2008; the Louis B. Sargent Jr Award in 2006; the George V. Oyelt Award of Honorary Committee D02 Membership in 2004, and the Committee D02 Sydney D. Andrews Scroll of Achievement in 2003. In 2010, Rand received the Charles B. Dudley Award for Manual 1, Significance of Tests for Petroleum Products, 8th Edition, which has become ASTM’s best selling Manual.

Dr. Verstuyft received the William T. Cavanaugh Memorial Award in 2003. In 2010, Rand received the Charles B. Dudley Award for Manual 1, Significance of Tests for Petroleum Products, 8th Edition, which has become ASTM’s best selling Manual.
