INDEX

Absorption, tests, 65
Adhesive, 20
Adjacent work, installation tolerances, 53
Allowable-stress design, 4, 24, 31-32
   safety factor, 117
Anchor, 19, 36
   brake-formed kerf clip, 98, 100
   capacity and effective engagement
   length test, 125
   correct device configuration, 78-86
   connection components, 80-81
   design rules, 78
   moisture collection or retention, 84
   points of contact, 82-83
   slippage, 84-86
   weight support, 81-82
   design and installation philosophy, 77
   determinancy, 77-78
   device limit state, 43
   device types, 89-97
   kerf anchor, 90
   rod anchor, 90-93
   rod-and-plug anchor, 92-94
   tooled-rod anchor, 94-96
   wire tie anchor, 95-96
   direct attachment, 87
   displacement analysis during tests, 74
   durability, 78
   end-prying, 75
   extruded, 99-101
   function, 77
   handling stone during installation on,
   86-89
   indeterminancy, 77
   inspectsability, 78
   installation standards, 88
   joint design, 51
   kerfed liner block, 100-101
   materials of construction, 88-89
   movement accommodation, precast-
   supported stone, 54
   performance factors, 57
   resistance, 73
   sealed chamber testing, 75
   shank-with-disc slot, 100-101
   subframes, 87-88
   tests, 69-73
   vulnerability to material strength
   inconsistencies, 66
