Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.
The First International Symposium on Surface Characteristics was sponsored by ASTM Committee E17 on Pavement Management Technologies (Rolands L. Rizenbergs, chairman) and the Technical Committee on Surface Characteristics (Jean Reichert, chairman) of the Permanent International Association of Road Congresses (PIARC), with the cooperation of the Transportation Research Board and the Federal Highway Administration. The symposium was organized by the Transportation Institute of The Pennsylvania State University and held in State College, Pennsylvania, on 8 to 9 June 1988. Wolfgang E. Meyer, The Pennsylvania State University and Jean Reichert, Belgian Road Research Center served as chairmen of the symposium and as editors of this publication.
A Note of Appreciation To Reviewers and Translators

The quality of the papers in this publication reflects not only the efforts and abilities of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort. Likewise we recognize and appreciate the task performed by the translators who helped make this publication more accessible to French speaking readers.
