Flammability and Sensitivity of Materials in Oxygen-Enriched Atmospheres: Fourth Volume

Joel M. Stoltzfus, Frank J. Benz, and Jack S. Stradling, editors
NOTE

The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.
FOREWORD

The Fourth International Symposium on Flammability and Sensitivity of Materials in Oxygen-Enriched Atmospheres was presented at Las Cruces, New Mexico, from April 11 to 13, 1989. The symposium was sponsored by ASTM Committee G-4 on Compatibility and Sensitivity of Materials in Oxygen-Enriched Atmospheres. Joel Stoltzfus, Jack Stradling, and Frank Benz, NASA Johnson Space Center, White Sands Test Facility, served as cochairmen of the symposium.

ACKNOWLEDGMENT

The quality of papers in this publication reflects not only the obvious efforts of the authors but also the unheralded work of the reviewers. Coleman Bryan, Barry Werley, Dr. Robert Lowrie, Kenneth McIlroy, and Joel Stoltzfus acted as review coordinators, enlisting appropriate reviewers and ensuring that reviews were completed properly and submitted on time. The editors also wish to acknowledge Susan Staley, Monica Armata, and Rita Harhut for their efficient and diligent assistance in preparing this document.

Contents

Overview 1

DEVELOPMENT AND EVALUATION OF TEST METHODS

An Evaluation of the Liquid Oxygen Mechanical Impact Test—G. E. MOFFETT,
N. E. SCHMIDT, M. D. PEDLEY, AND L. J. LINLEY 11

Ignition of Nonmetallic Materials by Impact of High-Pressure Oxygen II: Evaluation
of Repeatability of Pneumatic Impact Test—N. E. SCHMIDT, G. E. MOFFETT,
M. D. PEDLEY, AND L. J. LINLEY 23

The Effects of Testing Methodology on the Promoted Ignition-Combustion Behavior of
Carbon Steel and 316L Stainless Steel in Oxygen Gas Mixtures—K. McILROY
AND R. ZAWIERUCHA 38

Promoted Combustion of Nine Structural Metals in High-Pressure Gaseous Oxygen: A
Comparison of Ranking Methods—T. A. STEINBERG, M. A. RUCKER, AND
H. D. BEESON 54

Modeling and Data Evaluation of the WSTF Frictional Heating Test
Facility—W. W. YUEN 76

IGNITION AND COMBUSTION OF NONMETALS

The Oxygen Sensitivity/Compatibility Ranking of Several Materials by Different Test
Methods—B. J. LOCKHART, M.D. HAMPTON, AND C. J. BRYAN 93

Further Studies of Factors That Affect the Spontaneous Ignition Temperatures of
I. SWINDELLS 106

The Ignition Behavior of Silicon Greases in Oxygen Atmospheres—J. L. CURRIE,
R. S. IRANI, AND J. SANDERS 125

IGNITION AND COMBUSTION OF METALS

Promoted Ignition-Combustion Behavior of Selected Engineering Alloys in Oxygen Gas
Mixtures—R. ZAWIERUCHA AND K. McILROY 145

Fire Spread Rates Along Cylindrical Metal Rods in High-Pressure Oxygen—J. SATO 162

Pressurized Flammability Limits of Metals—J. S. ZABRENSKI, B. L. WERLEY,
AND J. W. SLUSSE 178
Combustion of 316 Stainless Steel in High-Pressure Gaseous Oxygen—F. J. BENZ, T. A. STEINBERG, AND D. JANOFF

The Pv Product Required for the Frictional Ignition of Alloys—J. M. STOLTZFUS, F. J. BENZ, AND J. HOMA

DESIGN, ANALYSIS, AND TESTING OF OXYGEN COMPONENTS

Design of an Ignition-Resistant, High-Pressure, High-Temperature Oxygen Valve—R. C. CHRISTIANSON AND B. A. PLANTE

Oxygen Compatibility of Pressure Regulators for Gas Cylinders—H. BARTHELÉMY, G. DELODE, AND G. VAGNARD

Discussion

Ignition of PTFE-Lined Flexible Hoses by Rapid Pressurization with Oxygen—D. JANOFF, L. J. BUTFORD, S. E. NEWTON, AND C. J. BRYAN

Evolving Non-Swelling Elastomers for High-Pressure Oxygen Environments—R. S. IRANI, J. L. CURRIE, AND J. SANDERS

Surface Modification of Monel K-500 as a Means of Reducing Friction and Wear in High-Pressure Oxygen—M. V. GUNAJI, J. M. STOLTZFUS, L. SCHOENMAN, AND J. KAZAROFF

DESIGN, ANALYSIS, AND TESTING OF OXYGEN SYSTEMS

Oxygen Fires, Materials Compatibility and System Contaminants—S. A. BARTER AND L. W. HILLEN

Evaluating Systems for Oxygen Service Through the Use of Quantitative Fault Tree Analysis—A. J. SANTAY

The Oxidant O₂ (Helium) Index of Flammability of Endotracheal Tubes—J. I. SIMPSON, G. L. WOLF, AND G. A. SCHIFF

Oxygen-Enriched Fires During Surgery of the Head and Neck—M. E. BRULEY AND C. LAVANCHY

Measurements of Oxygen-Enrichment in Foam Insulation for Liquid Nitrogen Pipelines—C. V. HOKKANEN
