advanced in this publication.

Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors 
addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) 
and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the 
authors and the technical editor(s), but also the work of these peer reviewers. The ASTM 
Committee on Publications acknowledges with appreciation their dedication and contrib-
ution of time and effort on behalf of ASTM.

Foreword

This publication, *Ground Water and Vadose Zone Monitoring*, contains papers presented at the symposium on Standards Development for Ground Water and Vadose Zone Monitoring Investigations, which was held on 27–29 Jan. 1988 in Albuquerque, New Mexico. The symposium was sponsored by ASTM Subcommittee D18.21 on Ground Water Monitoring, a subcommittee of ASTM Committee D-18 on Soil and Rock, and was developed in cooperation with the U.S. Environmental Protection Agency's Environmental Monitoring Systems Laboratory and the U.S. Geological Survey's Office of Water Data Coordination. David M. Nielsen, of Blasland, Bouck & Lee, presided as chairman of the symposium and also served as editor of this publication. In addition, A. Ivan Johnson, of A. Ivan Johnson, Inc., also served as editor of this publication.
Contents

Overview

VADOSE ZONE MONITORING

Methods for Sampling Fluids in the Vadose Zone—L. G. WILSON 7

Monitoring of Immiscible Contaminants in the Vadose Zone—
THOMAS P. BALLESTERO, SUSAN A. McHUGH, AND NANCY E. KINNER 25

Tensiometers—Theory, Construction, and Use—DAVID I. STANNARD 34

DRILLING, DESIGN, DEVELOPMENT, AND REHABILITATION OF MONITORING WELLS

Monitor Well Drilling and Testing in Urban Environments—STEPHEN A. SMITH 55

Rationale for the Design of Monitoring Well Screens and Filter Packs—
RONALD SCHALLA AND WALLACE H. WALTERS 64

Experimental Screen Design for More Sediment-Free Sampling—
CHARLES A. RICH AND BRUCE M. BECK 76

Monitoring Well Development—Why and How—DAVID L. KILL 82

Monitoring Well Rehabilitation Using the Surge Block Technique—
JOHN E. SEVEE AND PETER M. MAHER 91

Monitoring Wells: Maintenance, Rehabilitation, and Abandonment—
DUANE L. WINEGARDNER 98

Sorption of Aromatic Hydrocarbons by Materials Used in Construction of Ground-Water Sampling Wells—ROBERT W. GILLHAM AND STEPHANIE F. O’HANNESIN 108

AQUIFER HYDRAULIC PROPERTIES AND WATER-LEVEL DATA COLLECTION

Selection of Single-Well Hydraulic Test Methods for Monitoring Wells—
CURTIS A. KRAEMER, JOHN B. HANKINS, AND CARL J. MOHRBACHER 125
Hydraulic Conductivity Determinations in Unlithified Glacial and Fluvial Materials—KENNETH R. BRADBURY AND MAUREEN A. MULDOON 138

Comparison of Slug Test Methodologies for Determination of Hydraulic Conductivity in Fine-Grained Sediments—BEVERLY L. HERZOG AND WALTER J. MORSE 152

Methods for Evaluating Short-Term Fluctuations in Ground Water Levels—STEVEN P. SAYKO, KAREN L. EKSTROM, AND RUDOLPH M. SCHULLER 165

Water Level Monitoring—Achievable Accuracy and Precision—H. RANDY SWEET, GERRITT ROSENTHAL, AND DOROTHY F. ATWOOD 178

Presentation of Water Level Data—ROGER J. HENNING 193

MONITORING WELL PURGING AND GROUND-WATER SAMPLING

A Comparison of Two Multiple-Level Ground-Water Monitoring Systems—W. R. RIDGWAY AND D. LARSEN 213

Total Versus Dissolved Metals: Implications for Preservation and Filtration—JAMES D. PENNINO 238

How Flat Is Flat?—Termination of Remedial Ground-Water Pumping—G. M. SPREIZER, D. MAXIM, N. VALKENBURG, AND M. HAUPTMANN 247

Flexible Selection of Statistical Discrimination Tests for Field-Monitored Data—EDWARD A. McBEAN AND FRANK A. ROVERS 256

In Situ Analysis of Benzene, Ethylbenzene, Toluene, and Xylenes (BTEX) Using Fiber Optics—WAYNE CHUDYK, KENNETH POHLIG, KOSTA EXARHOUKAKOS, JEAN HOLSINGER, AND NICOLA RICO 266

MONITORING IN KARST

Special Problems of Ground-Water Monitoring in Karst Terranes—JAMES F. QUINNAN 275
