### NOTE

The Society is not responsible, as a body,  
for the statements and opinions  
advanced in this publication.

### Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

## Foreword

This publication, *Quantitative Methods in Fractography*, contains papers presented at the symposium on Evaluation and Techniques in Fractography, which was held 10 Nov. 1988 in Atlanta, Georgia. Two ASTM committees, Committees E-9 on Fatigue and E-24 on Fracture Testing, sponsored the event. The symposium cochairmen were Bernard M. Strauss, Teledyne Engineering Services, and Susil K. Putatunda, Wayne State University, both of whom also served as editors of this publication.

# Contents

<b>Overview</b>	1
<b>Applications of Quantitative Fractography and Computed Tomography to Fracture Processes in Materials</b> —STEPHEN D. ANTOLOVICH, ARUN M. GOKHALE, AND CLAUDE BATHIAS	3
<b>Relationships Between Fractographic Features and Material Toughness</b> —D. P. HARVEY II AND M. I. JOLLES	26
<b>Quantitative Analysis of Fracture Surfaces Using Fractals</b> —D. J. ALEXANDER	39
<b>Analysis and Interpretation of Aircraft Component Defects Using Quantitative Fractography</b> —N. T. GOLDSMITH AND G. CLARK	52
<b>Characteristics of Hydrogen-Assisted Cracking Measured by the Holding-Load and Fractographic Method</b> —NAOTAKE OHTSUKA AND HIROSHI YAMAMOTO	69
<b>Fractographic Study of Isolated Cleavage Regions in Nuclear Pressure Vessel Steels and Their Weld Metals</b> —X. J. ZHANG, A. KUMAR, R. W. ARMSTRONG, AND G. R. IRWIN	89
<b>Fractographic and Metallographic Study of the Initiation of Brittle Fracture in Weldments</b> —P. L. HARRISON, D. J. ABSON, A. R. JONES, AND D. J. SPARKES	102
<b>Cracking Mechanisms for Mean Stress/Strain Low-Cycle Multiaxial Fatigue Loadings</b> —PETER KURATH AND ALI FATEMI	123
<b>Corrosion Fatigue Crack Arrest in Aluminum Alloys</b> —R. J. H. WANHILL AND L. SCHRA	144
<b>Author Index</b>	167
<b>Subject Index</b>	169
