### Photocopy Rights

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the AMERICAN SOCIETY FOR TESTING AND MATERIALS for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$2.50 per copy, plus \$0.50 per page is paid directly to CCC, 27 Congress St., Salem, MA 01970; (508) 744-3350. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0-8031-1444-3/92 \$2.50 + .50.

### Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution to time and effort on behalf of ASTM.

## Foreword

This publication, *Cyclic Deformation, Fracture, and Nondestructive Evaluation of Advanced Materials*, contains papers presented at the symposium of the same name held in San Antonio, Texas, 12–13 November 1990. The symposium was sponsored by ASTM Committee E9 on Fatigue and its Subcommittees, E9.03 on Fatigue of Advanced Materials and E9.01.07 on Research on Nondestructive Evaluation of Advanced Materials. M. R. Mitchell, Rockwell International, and Otto Buck, Iowa State University, presided as symposium chairmen and are editors of this publication.
