Physical Properties of Asphalt Cement Binders

John C. Hardin, Editor

ASTM Publication Code Number (PCN):
04-012410-08
Foreword

This publication, Physical Properties of Asphalt Cement Binders, contains papers presented at the symposium of the same name held in Dallas/Fort Worth Airport, TX on 7 December 1993. The symposium was sponsored by ASTM Committee D-4 on Road and Paving Materials. John C. Hardin of E. A. Mariani Asphalt Company presided as Chairman is the editor of the resulting publication.
Contents

Overview ix

The New Proposed Rheological Properties of Asphalt Binders: Why are they Required and how do they Compare to Conventional Properties—H. U. BAHIA AND D. A. ANDERSON 1

The SHRP Direct Tension Specification Test-Its Development and Use—D. A. ANDERSON AND R. DONGRE 51

The Pressure Aging Vessel (PAV): A Test to Simulate Rheological Changes Due to Field Aging—H. U. BAHIA AND D. A. ANDERSON 67

Evaluation of Nevada's Binders Using SHRP Specifications—P. E. SEBAALY, S. BLAKELY AND J. EPPS 89

Oxidation of Asphalt Binders and its Effect on Molecular Size Distribution and Consistency—A. S. NOURELDIN 137

Long Term Performance of Asphalt Cement Binders: A Dual View—A. S. NOURELDIN 154

Testing of Softening Point and Brittle Point of Asphalt Mixtures—M. YAMADA 175

Furfural Substitutes for Chemical Modification of Asphalt—G. M. MEMON, J. G. BOONE AND B. H. CHOLLAR 186

Properties of Microwave Recycled Asphalt Cement Binders—J. E. SHOENBERGER, R. S. ROLLINGS AND R. T. GRAHAM 205

Physical Properties of Tall Oil Pitch Modified Asphalt Cement Binders—R. A. JOHNSON AND A. G. JURISTOVSKI 220
