CONTENTS

	PAGE
Introduction—E. B. Curdts	1
Preliminary Corona Resistance Test Results from IEC Activities—C. W. Ross . . .	3
Effects of Corona on Thermosetting Plastic Laminates—A. Rufolo and R. R. Winans.	8
Corona Resistance Test Method for Laminates, Molded, and Cast Materials— W. T. Starr	15
Preliminary Investigation of Proposed Pulse Method for Measuring Ionization— F. S. Oliver, E. H. Povey, and T. A. Pinckham	20
Corona Detection and Measurement at Sixty Cycles—J. R. Nye	25
Test Methods for Measuring Energy in a Gas Discharge—S. I. Reynolds	28

NOTE.—The Society is not responsible, as a body, for the statements and opinions in this publication.

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
