Sixtieth Annual Meeting Papers

Symposium on

DETERMINATION OF DISSOLVED OXYGEN IN WATER

Published by the
AMERICAN SOCIETY FOR TESTING MATERIALS

ASTM Special Technical Publication No. 219
NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
CONTENTS

Introduction ................................................................. 1
A Study of the Accuracy of Methods of Testing for Dissolved Oxygen in High-Purity Water—K. G. Stoffer ........................................ 3
Discussion ......................................................................... 14
Polarographic Measurement of Dissolved Oxygen—W. W. Eckenfelder, Jr. and Conrad T. Burris ....................................................... 18
Discussion ......................................................................... 29
The Beckman Dissolved Oxygen Analyzer—Thomas Finnegan and Ross C. Tucker ................................................................. 30
Discussion ......................................................................... 38
Evaluation of Hartmann and Braun Dissolved Oxygen Recorder for Boiler Feedwater—A. J. Ristaino and A. A. Dominick ...................... 40
Discussion ......................................................................... 48
Determination of Dissolved Oxygen by Means of The Cambridge Analyzer—H. A. Grabowski ............................................................... 49
Discussion ......................................................................... 56
General Discussion ............................................................ 59
FOREWORD

This Symposium on Determination of Dissolved Oxygen in Water was sponsored by ASTM Committee D-19 on Industrial Water. The papers and discussion were presented on the evening of Thursday, June 20, 1957, on the occasion of the Society's Sixtieth Annual Meeting in Atlantic City, N. J. F. U. Neat, Senior Engineer, Power Production Stations, Baltimore Gas and Electric Co., Baltimore, Md., presided at the session. Chairman of the Symposium Committee was R. C. Adams, (Vice Chairman of Committee D-19), Superintendent of the Chemical Engineering Laboratory of the U. S. Naval Engineering Experiment Station, Annapolis, Md.
THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country’s leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
