The technical data and their interpretation and any conclusions and opinions presented in the papers and discussions of this publication are independent expressions of the authors and do not necessarily conform to the consensus nor imply sanction by ASTM Committee D-27 on Electrical Insulating Liquids and Gases or by the AIEE Insulated Conductors Committee.

FOREWORD

This symposium, the eighth of a series of Symposia on Insulating Oils, was presented in New York on November 18, 1959, under the joint sponsorship of the Insulations Subcommittee of the American Institute of Electrical Engineers' Committee on Insulated Conductors and ASTM Committee D-27 on Electrical Insulating Liquids and Gases.

Previous symposia in the series sponsored by Subcommittee IV on Liquid Insulation of ASTM Committee D-9 on Electrical Insulating Materials, predecessor of Committee D-27, were published in ASTM Bulletin No. 146, May 1947, and No. 149, December 1947, and as ASTM Special Technical Publications Nos. 95, 135, 152, 172, and 218.

**NOTE.—The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.**

CONTENTS

	PAGE
Introduction—V. R. Mulhall.....	1
Paper for High-Voltage Cables—Wm. A. Del Mar.....	3
Discussion.....	12
The Why and How of Cable Oil Tests—A Review—R. B. Blodgett.....	15
Discussion.....	28
The Utility Viewpoint on Cable Oils—A. M. Gates and R. W. Gillette.....	32
Discussion.....	38

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
