Index

A
Additives, to concrete, 12–14, 50–53
   Calcium chloride, 13
   Effect on corrosion, 50
   Effect on permeability, 50
Inhibitors, 53–55
Latex, 13
Wax, 14

B
Bacterial action, 32
Bibliographies, 3

C
Cathodic protection, 61–68
   Galvanic systems, 62
   Impressed current systems, 62
   Of bridge decks, 62
   Of parking garages, 62
   Protection criteria, 62–68
Cement, types, 10
Chloride
   Level monitoring, 34, 35
   Removal by electromigration, 55
   Sources of in concrete, 30
   Threshold levels for corrosion, 19, 26
Coatings, for reinforcement, 55–61
   Galvanized, 57–61
   Metallic, 56–61
   Nickel-coated, 58, 60–61
   Nonmetallic, 56
Corrosion
   Caused by chloride levels, 17, 18
   Rate effects, 4
Costs
   Bridge restoration, 6, 7
   Damage due to salting, 7
   Road salting, 7
Cover
   Effect on corrosion, 19, 26
   Effect on protection, 48, 49
   Versus expansive force, 49
Cracking
   Corrosion induced, 6
   Effect on corrosion in concrete, 19, 49
   Stress corrosion, 5, 9, 24, 25

D
De-icing salt, application, 1
Diffusion
   Effect of water/cement ratio on, 12
   In concrete, 12

E
Electrical resistance
   Effect of chloride and moisture on
   concrete, 34, 35
   Technique for corrosion measurement, 37, 38
Electromigration, 55
Embedded/external steel interactions, 30, 31
Epoxy
  Coatings for reinforcement, 55–61
Concrete, 14

Effect on passivation, 15
Effect on corrosion rate, 16, 20, 21, 23, 27

Fatigue, 6, 45–47
  Effect of cracks in concrete on, 47
  Effect of frequency on, 46
  Effect of steel reinforcement types, 45
  Of unclad reinforcement, 45

Effect on polarization resistance, 40
Technique for corrosion measurement, 40, 41

Galvanic effects, 32

Galvanic effects, 32

Garages
  Corrosion of reinforcement in, 27
  Protection against corrosion in, 49

Impedance, corrosion measurement method, 43
Inhibitors, 53–55
Inspection, visual, 34

Macrocells
  Action in concrete, 20, 21, 23
  Current measurement techniques, 43
  Effect on polarization resistance, 41–43
  Effect on potential, 17
Membranes, 51–53
Methyl methacrylate, 51
Millscale, effect on passivation, 15

Overlays
  High-density concrete, 50
  Latex concrete, 50
Oxygen
  Diffusion through concrete, 12, 21

Passivation
  Breakdown by chloride, 15
  Effect of millsacle, 15
  Effect of pH, 15

Permeability
  Effect of additives on, 50
  Of concrete, 11

pH
  Effect on passivity, 15
  Levels in concrete, 15, 22

Polarization, criterion for cathodic protection, 64

Polarization resistance
  Effect of macrocells on, 40
  Technique for corrosion measurement, 40, 41

Potential
  Corrosion mapping, 17, 37
  Criterion for cathodic protection, 64, 65
  Effect of macrocell versus microcell, 37
  Low active region, 23
  Measurement techniques, 35, 36

Prestressing
  Corrosion fatigue, 24
  Corrosion of, 24, 29
  Stress-corrosion of, 5, 9, 24, 25
  Protection, methods of, 48–68

Ratio
  Pilling-Bedworth, 5

Water/cement
  Effect on concrete permeability, 18
  Effect on protection, 48, 49
  Effect on time to corrosion, 18, 26
  Of concrete, 11
Reference electrodes
  For embedded use, 66
  For use in potential scans, 36
Repairs, effect on subsequent corrosion, 20, 53

S
Seawater
  Corrosion of reinforcing steel in, 26
  Effect on diffusion in concrete, 19
Silane treatment, 51
Standards, 69–70
  American, 69
  Foreign, 70

Stray currents, 32
Stress
  Due to corrosion product, 6
  Effects on corrosion rate, 33

T
Test specimens
  Large-scale, 18, 60
  Small-scale, 18, 57, 60

W
Workmanship, 14
