Index

A
Absorptivity of concrete, 487
Acid water attack on concrete (see also Concrete, corrosion of), 132
Acoustic emission tests, 595, 598
Adhesive bonding, 915
Adhesives, 142
Aggregate
  Bituminous pavement for, 46
  Cracking, 188
  Durability, 497, 605, 617, 629
  Durability in seawater, 266
  Thermal expansion, 497
  Wetting and drying, 617, 629
Aging (see also Weathering)
  Accelerated, 20, 25, 110, 126, 141, 940
  Accelerated, of particle board, 940
  Bituminous pavements, of, 48
  Factors of (see also Degradation factors), 93
  Indicators, 21, 25, 93, 113
  Sealants, of, 643
Aging test
  Acceleration factor, 128
  Environment, 110
Aging, wood
  Accelerated, of adhesive bonded, 915
  Adhesive bonded, rate of, 917
  Air bubbles in asphalt, 796
  Air leakage, 232
  Alkali-aggregate reaction, 132, 261, 269, 277, 296
  Alkali reaction, testing, 341
  Alkali-resistant glass fiber, 133, 138
  Alligatoring in asphalt membrane, 794
  Art galleries, 231
  Asphalt, 767
B
Basalt, as concrete aggregate, durability in chloride and sulfate solution, 605
Basalt, as concrete aggregate, influence on concrete durability, 326, 617
Beams
  Concrete, spalling of, seawater, 209
  Glued-laminated wood, 925
Biological factors, 23
Bituminous pavements, 47
Bridge decks, 41
Building components, service life, 80
Building history, 8

1025
Building regulations, Australian State Government, 106
Building service life, 77, 99
Built-up roofing, survey of performance, 741

Cadmiums, colorant, 735
Carbonate rocks, durability, 497, 605, 629
Carbonation of concrete, 270
  Containing blast furnace slag, 271
  Rate of, 272
Chalking of paints, 116
  Effect of exposure angle, 123
Chimneys, thermal effects on concrete, 191
Climate data, Australia, 114
  Frequency distributions, 152
Climate factors (see also Weather factors or Degradation factors), 111
Climate laboratory tests of roofing materials, 764
Climates, having large temperature variations, 188
Climatological conditions, 243
Coatings (see also Paints), 141, 698
Coefficients of thermal expansion of polymers, 186
Colorants, for plastics, 731, 853
Composites, 133, 179
Composite, stress due to thermal expansion, 180
Composite pavements, 43
Concrete, carbonation (see Carbonation)
  Concrete, cellular, 577
Concrete overlays, 194
Corrosion of aggregates in concrete
  Calcium chloride, by, 605
  Magnesium sulfate, by, 605
Corrosion of cement mortars
  Carbonation, flexural strength, 369
  Chlorides, by, 319
  In carbonate attack, compressive strength, 371
Corrosion of concrete
  Ammonium chloride, by, 388
  Ammonium nitrate, by, 388, 397
  Ammonium sulfate, by, 388
  Calcium ammonium nitrate, by, 397
  Carbonic acid, by, depth of corroded zone, 355, 377
  Nitrogen fertilizer factories, in, 388, 397
  Rate of, 301
  Sulfate attack (see Sulfate attack)
  Seawater (see Seawater attack)
Corrosion of hydrated portland cement
  Carbonic acid, by, influence of blast furnace slag, 369
  Carbonic acid, by, testing, 364
Corrosion of metals
  Cathodically protected, 985
  Critical humidity, 151, 152
  Fasteners in wood, 982
  Fire-retardant treated wood, in, 991
  Galvanized steel products, 166
  Organization, 1005
  Post-tensioning wires for concrete in seawater exposure, 213
  Preservative-treated wood, in, 985
  Sulfur dioxide pollution effect on, 165
  Test, 22
  Ties, 237
  Time-of-wetness, 152, 169
  Temperature, effect on, 159
  Wind velocity, effect on, 161
  Wood preservatives, effect of, 987
Corrosion of reinforcement in concrete, 139, 258, 290
Chloride content, 140, 196, 209
Half-cell potentials, 200
Cracks due to freezing, 434, 455
Crack movements, monitoring in masonry, 225
Creep of hydrated portland cement, 587
Criteria for durability evaluation, roofing membranes, 756
Criteria for replacement, 103
Criteria for failure, 21

D
Damage coefficient for a pollutant, 163
Degradation factors, 21, 25, 93, 113
Degradation mechanisms, 25
Deicers (see Freezing, Deicing salts)
Dimensional changes, 258, 270, 276, 316, 322, 326, 336, 367, 498, 510, 514, 520, 538, 566, 586, 617, 629, 643, 762, 967
Design and durability, 33
Dolomite, effect of, on sulfate resistance of concrete, 326
Doors, performance of, 88
Driving rain index, 146
Driving rain intensity, 150
Drying-shrinkage of cement, 323
Durability
Definition, 6, 17, 31, 92, 99
Historical, 7
Requirements, 107
Tests for, 48
Dwellings, performance of, 84

E
Environment, 35
Effect of, on materials, 33
Of Exposure, simulated for interior finishes, 124
Ettringite formation, 253, 260
Expansion (see Dimensional changes)
Exposure tests of concrete in marine and industrial environment, 139

F
Failure criteria, 23
Fatigue strength, 597
Fatigue test, particleboard, 936
Fibreboard, 961
Fitness for purpose, 68
Flexibility, low-temperature rubberized asphalt, 759
Freezing and thawing
Cycles, 151
Deicing salt gradient, 466, 481
Deicing salts, 456, 464, 474, 485, 552, 560, 284, 292, 629
Influence of w/c ratio, 435, 450, 510
In concrete, 464, 486, 512, 520, 283
In concrete, effect of cement composition, 283
In concrete, posttensioned—freezing in air and thawing in seawater, 207
In concrete, testing, 461, 512, 520, 550, 560
In hydrated portland cement, 425, 439, 455
In masonry, 235, 455, 462
In stone, 455
Permeability, 485
Porosity, 456, 545
Super cooling, 453, 478, 481
Test, roof decks, 781, 787
Thermal shock, 467, 481
Frost resistance of concrete
  Effect of aggregate, 295
  Effect of silica dust content, 536
  Made with dolomitic sand, 528
  Pressed units, 560
Frost resistance of sulfur concrete, 549
Fungi, decay in wood, 962

G
Galvanized steel in concrete reinforcement, 139
Galvanized zinc coatings, 125
Glass-fiber reinforced cement (GRC), 133
Glass-fiber reinforced polyester (GRP), 874, 890
Graveyard test (see Termite test)

H
Hydraulic conductivity (see Permeability)

I
Ice formation, in hardened cement paste, 425, 476
Ice formation, in steam cured cement paste, 439
Incompatibility factors, 23
Infrared imagery, 226
In-service evaluation, 97, 218
Inspection of facades of buildings, 222
Iron oxides, colorant, 734

J
Joint movements in buildings, 658, 678

L
Latex modified overlays, 194
Lead chromates, colorant, 735
Length changes (see Dimensional changes)
Lifetime distribution models, 62
Life expectancy, 58
  Of built-up roofing, 74
  Of wood, 921
Limestone, aggregate, effect on sulfate resistance of concrete, 326
Limestone, concrete aggregate, durability in chloride and sulfate solution, 605
Lime, unsoundness testing, 314

M
Maintenance
  Cards, 13
  Coefficient, 60
  Intervals, of coatings, 12
  Material consumption, 60
  Of buildings, 103
Marble, as concrete aggregate, durability in chloride and sulfate solution, 605
Material consumption, annual, 57
Mechanical damage due to freezing, 458, 469, 483
Metal corrosion (see Corrosion of metals)
Metal detector, used to located embedded steel in masonry, 225
Metal, oxides, pigments, 735
Microcracks in concrete, 577
Moisture redistribution due to freezing, 434, 457, 466

N
Natural exposure test, 120
Natural weathering, 207
  Of surface coatings, 141
O
Optimum life curves, 59
Outdoor exposure
  Site, 113
  Site, Japan, 120
  Stabilized asphalt coating systems, 769
Outdoor exposure testing, 110
Overlays, internally sealed concrete, microcracks, 203
Ozone, effect of on sealants, 643

P
Paints
  Chalking, 116
  Coatings, 116, 689, 698, 711, 721
  Degradation of resin, 116
  Durability, effect of climate, 718
  Durability, effect of formulation, 716
  Durability, testing, 689, 711, 721
  Leaching, 698
  Mechanical properties, 698
  Metal protective, 689, 721
  Moisture permeability, 698
  Pavement marker, 727
  Rate of degradation, 689
  Water absorption, 698
  Weathering, 689, 699, 711, 721
  Particleboard, evaluation of, 935, 946, 961
  Pentachlorephenol, 961
  Performance of built-up roofing, 743, 801
  Performance concept, 73, 107, 120
  Performance criteria, 22
  Performance evaluation system, 129
  Performance in service, 96
  Performance limit level, 84
  Performance of interior finishing materials, 126
  Performance requirements, 23
  Performance of sidewalks, 51
  Performance with time, material or component of a building, 99
  Performance of structural wooden sandwich panel, 128
  Permeability
    Concrete, 485, 258, 271, 410
    Paints, 698
  Photodegradation
    Plastics, 828, 853, 863
    Rate of, 904
  Photooxidation, 110, 831
  Plaster, failure test, 316
  Plastics, 731, 811, 827, 838, 853, 863, 874, 890, 904
  Colorant, 731
  Deterioration, testing, 818, 840, 863, 874, 890
  Plywood, 961
  Polymer (see Plastics)
  Polymer concretes, 184
  Pollutants, effect on metal corrosion, 160
  Portland cement, unsoundness, test, 317
  Predictive service life tests, 26
  Probability of survival (see Service life)
  PVC, mechanical properties, 759
  PVC, dehydro-chlorination, 838
  PVC, translucent sheeting, darkening of, 116

Q
Quality assurance system, 39
Quality control tests, 113
Quartzite, as concrete aggregate, durability in chloride and sulfate solution, 605

R
Radiation, UV, 115, 643, 822, 869, 874, 890, 904
Rain penetration, 32
Rainfall zones, 111
Reinforcement, in concrete, stainless steel, 139
Relative humidity, 231
Effect on metal corrosion, 158
Frequency distribution for Canadian stations, 153
Reliability concepts, 28
Replacement life, 101
Repetitive loading test machine, 936
Rocks, deterioration, effect of deicing salts, 629
Roofing membranes, resistance to moisture, 761
Rot fungi, 962

S
Sealants, 643, 658, 670, 678
Acrylic, 643
Adhesive failure, 670
Chemical stability, 670
Construction, 670
Cure rate, 670
Deformation characteristics, 643
Fatigue, 678
Oleo resinous, 643
Polysulfide, 643, 658, 678
Polyurethane, 643, 678
Silicone, 643, 658, 670, 678
Testing, 643, 658, 670
Seawater attack
Aggregate, 266, 605
Concrete, 209, 254, 286, 346
Concrete, effect of bauxite, 346
Concrete, effect of carbonation, 267
Concrete, effect of cement composition, 264
Concrete, exposure station, 207
Seal, perimeter, 670
Service life of buildings, 61
Service life, building materials and components, 9, 20, 56, 79, 86, 112
Shrinkage (see Dimensional changes)
Solar collectors, performance, 239
Solar irradiance factor, 108
Solar radiation, 111, 126
Solar weathering index, 109
Stack effect, 232
Strain relief tests, 224
Stress factors, 23
Stress in concrete due to thermal expansion, 578
Stress measurements, 224
Sulfate attack
Concrete, 132, 260, 274, 283, 286, 304, 605
Mortar, 326
Testing, 50, 304, 336
Sulfate environments, 27
Sulfate resistance, mortar, effect of fillers, 326
Sulfur-impregnated hydrated Portland cement durability, 332
Sunlamp exposure test apparatus, 115
Surface roughness, particleboard flooring, 949, 955

T
Tension tests, glued laminated wood beams, 926
Temperature cycling, 582
Temperature profile, in cellular concrete, 581
Terotechnology, 67
Termites, 973
Rating of damage, 977
Test, 975
Terra cotta, 218, 227
Thaumasite, 256
Timber, hardwood, Ghanaian, 973
Titanium dioxide, colorant, 853
Toughness-tenacity test for rubberized asphalt, 802
Toughness test, 760
U
Unsoundness of lime, 314
Unsoundness of portland cement, 317
Urea resin bonded boards, 937, 946
Use factors, 23, 112
User requirements, 71
UV lamp exposure test, 115

V
Viscosity of asphalt, 793
Volume change measurement (see also Dimensional changes), 596

W
Water permeance tests, 223
Weather, 35, 146
Weather observations in Canada, 154
Weather parameters (climatological records), New Zealand, 956
Weather stations, 154
Weathering (see also Aging)
Paint, 689, 721
Particleboard flooring, 948
Plastics, 113, 131, 811, 827, 838, 853, 863, 874, 890, 904
Weathering accelerated, 141, 689, 721, 769, 822, 838, 860, 863, 874, 890
Carbon arc, 127
Roofing materials, 765
Weathering factors, 23
Weathering of organic building materials, 113
Wood, aging, adhesive bonded, 914
Wood, decay due to rot fungi, 962
Wood preservative, ammoniacal copper arsenate, 988
Wood preservative, chromated copper arsenate, 987
Wood preservatives, corrosion of metals, effect on, 987

XYZ
Xenon arc exposure, 110
