## FOREWORD

---

The papers in this publication were presented at a Symposium on the Corrosion of Zirconium Alloys which was held November 20, 1963, during the Winter Meeting (November 18-21, 1963) of the American Nuclear Society in New York City.

This Special Invited Session was cosponsored by the Materials Service and Technology Division of ANS and by ASTM Committee B-3 on Corrosion of Nonferrous Metals and Alloys.

W. Kermit Anderson, of Knolls Atomic Power Laboratory (KAPL), was, at that time, chairman of both committees; William Cashin (KAPL) represented ANS.

---

**NOTE**—The Society is not responsible, as a body, for the statements  
and opinions advanced in this publication.

## CONTENTS

---

	PAGE
Introduction—Roger Sutton . . . . .	1
The Development of the Zircalloys—Stanley Kass . . . . .	3
Effect of Fluoride Ions on the Aqueous Corrosion of Zirconium Alloys—Warren E. Berry . . . . .	28
Discussion . . . . .	39
Zircaloy-2 Corrosion In-Pile in Aqueous Homogenous Reactor Solutions—G. H. Jenks. Recent Studies of the Growth and Breakdown of Oxide Films on Zirconium and Zirconium Alloys—J. N. Wanklyn . . . . .	41
Effect of Hydrogen and Hydride Morphology on the Tensile Properties of Zircaloy-2—W. J. Babyak, W. F. Bourgeois, and G. J. Salvaggio . . . . .	58
Neutron Irradiation and Cold Work Effects on Zircaloy-2 Corrosion and Hydrogen Pickup—W. A. Burns and H. P. Maffei . . . . .	76
The Factors Limiting the Utilization of Zirconium Alloys in Superheated Steam—H. H. Klepfer and D. L. Douglass . . . . .	101
	118

**T**HIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
