

Subject Index

A

Acoustic pressure method, 7
 Acousto-ultrasonics (See also
 Ultrasonics), 95, 105
 Adaptive systems, 165
 Adhesive strength, 95
 metal film, 67
 Air conditioners, rotary
 compressors, 287
 Airframe components, 146
 Alloy PE-16, 218
 Aluminum, 77, 273
 Aluminum-lithium alloys, 213
 Amplitude distribution
 analysis, 365
 Arrival time data, synthetic, 86
 Artificial flaw, 242
 Austenitic alloys, 218

B

Bending, three-point, 395
 Boron, 77
 Brazilian tests, 381
 Bronze particles, impact test, 273

C

Calibration source, 77
 Carbon fibers, 395, 416
 Cavitation, 305
 Ceramics
 flaw size and acoustic
 emission, 242
 microfracture, 47
 Composites, 95, 105, 424
 carbon fiber reinforced
 laminates, 416
 fiber, 395
 fiber-reinforced plastics, 123
 graphite/epoxy, 404
 microfracture, 47
 tensile tests, 123
 Compressors, rotary, 287
 Corrosion, acoustic emission test
 for, 185

Cracks, 347
 advanced, 146
 detection, 185, 199, 261
 growth, 146, 261
 kinematics, 347
 microcrack, 47
 model, elliptical, 365
 presence, 146
 surface friction, 199
 Cycling, thermal, 424
 Cylinders, compressed gas, 185

D

Damage detection, 424
 Data acquisition system, 146
 Decohesion, 252
 Deconvolution, 47, 67, 273
 Debonding, 252
 Deformation
 compressive, 252
 inelastic, 365
 tensile, 77, 213, 218
 Delta learning rule, 165
 Diagnostics, machine condition, 287
 Dilatancy point, 365, 381
 Drying characteristics, pine
 veneer, 435
 Dust impact process, 273

E

Earthquakes, 347
 preparation zone, 358
 Elastic impact, 273
 Elasticity, 105
 theory, 77
 Electromagnetic-acoustic
 transducer, 35
 Electron beam welding, 35
 End-notched flexure, 395
 Energy discriminating acoustic
 emission method, 416
 Erosion, 273
 cavitation, 305
 Event increment rate, 365
 Expert systems, 156, 316

F

- Failure mechanisms,
 - graphite/epoxy coupons, 404
- Fatigue
 - crack growth, 261
 - cyclic, tests, 199
 - damage modes, 416
- Fiber-reinforced plastics, 123
- Film adhesive strength, 67
- Flaw size, 242
- Flight, crack detection during, 146
- Fracture, 47, 146, 218, 328, 395
 - behavior, 123
 - hydro-, 347
 - inclusion, 77, 252
 - intergranular, 261
 - matrix splitting, 404
 - strength, effect on flaw size, 242
- Friction emission, 404

G

- Gas cylinders, compressed, 185
- Gear, spur, 261
- Geotechnics, 347, 365
- Glass particles, impact test, 273
- Grain boundary slippage, 358
- Graphite, 252
- Graphite/epoxy composites, 404
- Green's functions, 67, 273
 - dynamic, 47
 - simplified, 347

H

- Hatano method, 7
- Heat transfer, 435
- Hydrogen charging, 213
- Hydrogen embrittlement, 213
- Hydrostatic test, 185
- Hydrotest, 199
- Hydroturbines, 305

I

- Imaging, ultrasonic, 86, 381
- Impact damage, 424
- Impact, elastic, 273
- Impact, particle, 273
- Impact, plastic, 273
- Inclusion fracture, 77, 252

- Industrial environment, sensing, 25
- In-flight monitoring, 146
- Inspection, pressure vessel, 185, 199
- Integrity evaluation, 156
- Intergranular fracture, 261
- Inverse problems, 47, 165
- Iron, nodular cast, 252

J

- Joule heating, 67

L

- Lamb waves, 105
- Laminates, carbon reinforced composites, 416
- Lead, acoustic emission signals, 7
- Line source, 67
- Lithium, aluminum-, alloys, 213
- Loading conditions, rock fracture, 365
- Loading, thermo-mechanical, 424
- Localization, 199
- Low strain, 358

M

- Machine condition diagnosis, 287
- Machining, 328
- Maintenance, machine, 287
- Mapping, system, 165
- Mass production products, 287
- Matrix cracking, 395
- Matrix splitting, 404
- Mechanical properties, change assessment, 95
- Metals, 218, 261
 - coatings, 67
 - films, 67
 - microfracture, 47
- Microcracks, 47
- Microfracture, 47, 365, 381
- Micromechanics, 47
- Microseismics, 347, 358
- Milling, 316, 328
- Moisture content, 435
- Moment tensor analysis, 347

- Monitoring
 plant, 156, 287
 process, 35, 165
 tool, 316
- N**
- Neural networks, 165, 316, 328
 Neural signal processing, 165
 Nimonic alloy, 218
 Nodular cast iron, 252
 Nondestructive evaluation, 242
 quantitative, 47
- O**
- Orowan looping, 218
- P**
- Particle
 impact, 273
 shearing, 218
 second phase, 252
 Pencil lead fracture method, 7
 Pine veneer, 435
 Plant operability
 efficient, 287
 monitoring, 156
 Plastic impact, 273
 Plastics, fiber reinforced, 123
 Point source, 67
 Polyetheretherketone, 395
 Pressure vessels, 185, 199
 Process control, 35
 Process monitoring, 35, 165
- R**
- Rock, 347, 358, 365, 381
 Root mean square, 305
 Rotating machinery, 287
- S**
- Second phase particles, 252
 Sensitivity, sensor, 7
- Sensors, 328
 electron beam welding, for, 35
 housing, 25
 integrated, 25
 mounting condition, 7
 problems with, 7
 sensitivity, 7
 stress wave, 25
 transducers, 35, 47, 305
- Shear motion, 381
 Signal analysis, 199, 416
 development, 95
 Signal energy, 77
 Signal processing, 123, 328
 Signals, emission, 7
 fracture, 146, 242
 Silicon nitride, 242
 Source characterization, 165
 acoustic emission, 47
 Source inversion, 347
 Source location, 86, 347, 381
 Source mechanism, 381
 Splitting, matrix, 404
 Splitting, veneer, 435
 Spur gear, 261
 Steel
 carburized, 261
 stainless, 218
 Strain ageing, 218
 Strain levels, low, 358
 Stress concentration, 365
 Stress induced changes, 86, 381
 Stress, residual, 199
 Stress-strain curve, 365
 Stress waves, 95
 factor, 95
 sensing, 25
 Structural integrity function, 156
- T**
- Tectonic strain, 358
 Tensile deformation, 77, 213, 218
 Tensile tests, 123, 395
 Tension fatigue, 416
 Tensor analysis, moment, 347
 Thermal cycling, 424
 Thermal shock tests, 199
 Thermo-acoustic emission, 424
 Thermoelastic generation, 67
 Thermoelastic source, 67
 Thermoplastic, 395

Thick film hybrid, 25
Thin-film testing, 67
Through-thickness-transverse-resonance (TTTR), 105
Time data, synthetic arrival, 86
Tomography
 difference, 381
 passive, 86
Tools, cutting
 breakage, 316
 wear, 316, 328
Transducers, 47, 305
 electromagnetic-acoustic, 35
Transport vessels, compressed gas, 185
Turbines, hydro-, 305
Turning, 316, 328

U

Ultrasonics, 213
 acoustic, 95, 105

imaging, 86, 381
signals, 67

V

Velocity structure, 86
Veneer, southern pine, 435

W

Water, effect on acoustic emission, 213
Wave envelope processing, 123
Waveform parameters, 123
Wave propagation, 105
Waves, stress, 95
 sensing, 25
Wear, cutting tool, 316, 328
Welding, electron beam, 35
