

Subject Index

A

- Accuracy of measurements, 5
 - Definition, 45
 - EPA assessment methods, 41
- Acid precipitation and deposition, 96, 272, 375
- Aerometric data validation, 65
- Aerosol testing, 297
- Air quality measurement
 - data quality assessment, 65, 76, 89
 - EPA reference materials, 360, 370, 378, 417
 - manual source sampling, 169
 - meteorological quality assurance, 253
 - Method 6B, 160
 - NBS Standard Reference Materials, 346
 - particle size data validation, 147
 - personal exposure monitoring, 284
- Ames test, 260
- Ammonium, 89
- Analytical chemistry, 5, 103, 346
- Analytical methods, 5, 103, 133, 305, 334, 346
- ASTM Standard D 4210: 417
- Atmospheric acid deposition, 96, 272, 375
- Audits, quality, 9

B

- Biological-material analysis, 334
- Breath analysis, 284

C

- Calibration flowrate, 297
- Calibration standards (*see* Reference standards and materials)
- Cascade impactors, 147, 297
- Certification, 103, 200
- Chain of custody, 391
- Chemical analysis, 5, 103, 346
- Circles of quality, 10
- Clark, method of, 407
- Clinical Environmental Laboratory, 297
- Collaborative testing, 160
- Collection substrates, 147
- Collocated samplers, 76
- Computer flagging, 65
- Computerized monitoring, 68
- Consistency checks, 89 (*see also* Reference samples and materials)
- Contamination sources, 22
- Control charts, 5
- Control limits, 391
- Cooperative monitoring, 53
- Cyclones, 147

D

- Data precision (*see* Precision of measurement)
- Data quality assessment
 - accuracy and precision of measurement, 5, 41, 44, 76
 - Ames test, 260

Data quality assessment (*continued*)

- EPA methods, 41, 370
- human exposure studies, 284, 297
- particle size, 147
- program management, 391
- techniques, 5

Data quality (definition), 5

Data reduction, 36

Discharge monitoring, 200, 216, 237
(*see also* Water quality measurement)

EPA, 242

Tennessee Valley Authority, 65

Discharge monitoring report—quality assurance, 206, 242

Distribution audit, 297

Drinking water, 103 (*see also* Water quality measurement)**E**Effluent monitoring, 216, 237, 242 (*see also* Water quality measurement)

End-to-end audit, 297

Environmental analysis, 5, 346

Environmental Data Storage and Retrieval (ENDSTORE) system, 68

Environmental Protection Agency (*see* U. S. Environmental Protection Agency)

Exposure chamber, 297

F

Field blanks, 272

Fuels, 346

G

Gas chromatography, 116, 178, 284

Gaseous pollutants, 297

Great Lakes, 407

Groundwater monitoring, 22

H

Hazardous-waste incineration, 173

Herbicides, 116

High-volume sampling, 76

Human exposure testing, 284, 297

Hyacinths (water), 305

I

Incineration, 173

Inorganic compounds, 370

Intercomparison samples, 360 (*see also* Reference samples and materials)Interlaboratory quality control, 379, 407
(*see also* Reference samples and materials; Round-robin intercalibration)

ASTM D 4210: 417

Internal consistency checks, 89

Intersampler comparisons, 89

In vivo studies, 305

Ion balance, 89

L

Laboratory

certification, 103, 200

evaluation, 189

facilities, 133

local, 103

operations, 133, 233

personnel, 133, 234

practices, good, 7

Local laboratories, 103

M

Major dischargers, 206

Manual source sampling, 169

Marine analysis, 334

Marine Analytical Chemistry Standards Program (MACSP), 334

Marine reference materials, 305, 319, 334, 407

Marine sediment analysis, 334
 Marine standards, 319, 334, 407
 Mass balance, 89
 Measurement
 accuracy and precision of, 5, 41, 76
 completeness of, 41, 45
 data quality (*see* Data quality assessment)
 error assessment, 22
 Metals, 305
 Meteorological measurements, 253
 Method detection limit, 41
 Method 6B, 160
 Method standardization, 260
 Methylene chloride extraction of pesticides, 116
 Microbiology, 103, 133
 Monsanto Analytical Testing program, 237
 Motivation of testing personnel, 169
 Mutagenicity testing, 260

N

National Bureau of Standards, 346
 National Pollutant Discharge Elimination System (NPDES)
 permittees, 206, 242
 pulp and paper industry experience, 216
 self-monitoring data, 189, 216, 237
 Wisconsin implementation, 200
 National Research Council of Canada, 334
 Nitrate, 89
 Nitric acid, 89
 Nitrogen dioxide testing, 372
 Nonlinear measurement methods, 22
 Nonnormal errors, 22
 Nonprimacy, 103

O

Operator certification, 200
 Organic compounds, 370

P

Particle size distribution, 147
 Particulate sampling, 147, 350, 376
 Performance evaluation limits, 206
 Personal exposure monitoring, 284, 297
 Pesticides
 analysis of, 116
 intercomparison study, 368
 in surface waters, 110
 pH measurements, 110, 272
 Physiological data acquisition, 284, 297
 Plant discharge, 216, 237, 242
 Potable water, 103 (*see also* Water quality measurement)
 Precipitation, 96, 253, 272, 375
 Precision of measurement, 5, 76
 definition, 44
 EPA assessment methods, 41
 Priority pollutants, 346
 Probability plot, *illus.*, 38
 Program management, 391
 Pulp and paper industry, 216

Q

Quality assessment (*see* Data quality assessment)
 Quality assurance
 acid precipitation measurements, 272
 aerometric data management, 65
 ambient air analysis, reference materials, 370
 Ames test, 260
 certification of public water testing laboratories, 103
 collaborative testing of Method 6B, 160
 collocated ambient high-volume samplers, 76
 data validation, 89
 definition, 5
 design for groundwater monitoring, 22

Quality assurance (*continued*)
 DMR-QA studies
 Region VII (EPA) follow-up, 242
 reference samples, 378
 statistics and limits, 206
 EPA program, 12, 42
 establishing QA program, 391
 Great Lakes Monitoring Programs,
 interlaboratory aspects, 407
 human exposure studies, 297
 TEAM, 284
 manual source sampling, 169
 meteorological measurements, 253
 microbiological analyses of water,
 133
 Monsanto testing program, 237
 National Discharge Monitoring Re-
 port (DMR), 189
 National Research Council of Can-
 ada—Marine Analytical Chem-
 istry Standards Program, 334
 NBS Standard Reference Materials,
 346
 program design and development,
 53, 237, 253, 391, 407
 pulp and paper industry, 216
 U.S. Geological Survey (USGS)—
 water quality
 field measurements, 110
 reference samples (natural water),
 319
 Wisconsin NPDES program, 200
 Quality Assurance Project Plan (EPA),
 15, 42
 Quality control program
 pesticides in surface waters, 116
 Quality control samples (*see* Reference
 samples and materials)

R

Radiochemistry, 103
 Reference samples and materials, 305,
 319, 334

EPA, 360, 370, 378, 417
 Great Lakes Monitoring Program,
 407
 National Bureau of Standards, 346
 Relative humidity, 253
 Replicate sampling, 76
 Round-robin intercalibration, 237, 342

S

Safe Drinking Water Act, 103
 Safety audit, 297
Salmonella, 260
 Sampling error assessment, 22
 Sampling nozzles, 147
 Seawater analysis, 334
 Sediment analysis, 334, 346
 Single filter sampler, 297
 Solar radiation, 253
 Specific conductance, 110
 Stability of toxic materials, 305
 Stack gas sampling methods, 173
 Standard Operating Procedure of EPA,
 16
 Standard reference materials (*see* Ref-
 erence samples and materials)
 Standard Reference Water Sample
 (SRWS) project, 320
 Statistical estimates, 189
 Statistical treatment and analysis, 5, 22,
 78, 206, 328
 Sulfate, 89
 Sulfur dioxide emissions testing, 160,
 372
 Systems audit, 297

T

Temperature, 253
 Tenax GC, 285
 Tennessee Valley Authority, 65
 Thermal oxidation of hazardous waste,
 173
 Total Exposure Assessment Method-
 ology (TEAM), 284

Total suspended particulate, 76, 89
 Toxic elements, 305
 Trace analysis, 346
 Training of testing personnel, 169

U

U.S. Environmental Protection Agency
 analysis of effluent samples, pro-
 cedures for, table, 227
 data quality assessment methods, 41
 Discharge Monitoring Report—
 Quality Assurance, 206, 242
 guidelines for quality assurance plan,
 254
 laboratory certification, 103
 Method 6B, 160
 National Pollutant Discharge Elim-
 ination System, 189, 216
 quality assurance program, 12, 41,
 53, 103, 133, 391
 reference materials, 360, 370, 378
 U.S. Geological Survey water quality
 measurements, 110, 319

V

Variance analysis, 22
 Volatile organic compounds, 284

W

Warning system, 103
 Wastewater monitoring and analysis,
 133, 378 (*see also* Water qual-
 ity measurement)

Water analysis (*see* Water quality
 measurement)
 Water hyacinth, 305
 Water quality measurement
 EPA drinking water certification
 program, 133
 EPA reference samples, 378
 EPA results, 242
 error assessment, 22
 Great Lakes, 407
 laboratory certification, 103
 Marine Analytical Chemistry Stan-
 dards Program (MACSP),
 334
 microbiological analysis, 133
 modeling, 25
 Monsanto Analytical Testing Pro-
 gram, 237
 NBS Standard Reference Materials,
 346
 personal exposure monitoring, 284,
 297
 pesticides in surface waters, 116
 pulp and paper industry, 216
 U.S. Geological Survey measure-
 ments, 110, 319
 Work/Quality Assurance Project Plan,
 53
 Wind direction, 253
 Wind speed, 253

Y

Youden, method of, 408
