

# Subject Index

- A
- Ambient concentration standards, 21
  - Analytical methods
    - dioxin, 124, 132
    - EPA Contract Laboratory Program evaluation, 74
    - inorganic, 103, 112
    - pesticides, 198
    - semi-volatile organic, 143, 157
    - volatile organic, 173, 185
  - Argon plasma, 112
  - Aroclor, 198
  - Audits
    - data, 85
    - procedural, 67
- C
- Calibration check
    - compounds, 143, 173
  - CERCLA (See Superfund Contract Laboratory Program)
  - Chain-of-custody
    - procedures, 67
  - Chemicals, organic, 35, 143, 157, 173, 185, 198
  - Comprehensive Environmental Response, Compensation and Liability Act (See Superfund Contract Laboratory Program)
  - Contract Laboratory Program of the EPA (See Superfund Contract Laboratory Program)
- D
- Database, quality
    - assurance, 85, 165, 185
  - Data quality objectives, 21
  - Decontamination techniques, 3
  - Detection limits, 112, 132, 169
  - Dioxin, 124, 132
  - Document control, 67
  - Drilling equipment and techniques
    - advance casing, 9
    - auger, 4
    - cable tool, 8
    - downhole air hammer, 8
    - hollow rod, 9
    - jetting, 9
    - quality control, 3
    - rotary, 6
- E
- Electron capture detector, 198
  - Environmental Protection Agency
    - Contract Laboratory Program (See Superfund Contract Laboratory Program)
    - Dioxin analysis method, 124, 132
    - Routine Analytical Services, 74
    - Special Analytical Services, 74
    - Superfund program (See Superfund Contract Laboratory Program)
  - Extraction methods, 143
- F
- Flame atomic absorption, 103
- G
- Gas chromatography
    - dioxin analysis, 124, 132
    - pesticide analysis, 198
    - semi-volatile organic analysis, 143, 157
    - volatile organic analysis, 173, 185
  - Gel permeation chromatography, 198

- Geostatistics, 43
- Graphite furnace atomic absorption, 103, 112
- Groundwater  
 monitoring, 3, 21  
 protection standards and regulations, 21  
 sample collection, 3
- H
- Heated graphite furnace atomic absorption, 103, 112
- I
- Inductively coupled plasma, 103, 112
- Inorganic analytical methods, 103, 112
- Internal standards, 143, 163, 173
- Isotope dilution mass spectrometry, 124, 132
- K
- Kriging, 43
- M
- Mass spectrometry, 124, 132, 143, 157, 173, 185
- Matrix spikes, 143, 173, 185
- Mercury cold vapor, 112
- Metal pollution, 35, 57, 103, 112
- Method detection limits, 112, 132, 169
- Method validation, 198
- O
- Organic analytical methods, 143, 157, 173, 185, 198
- Organic chemicals and compounds, 35, 143, 157, 173, 198
- Organochlorine pesticides, 198
- P
- PCBs, 198
- Performance criteria and evaluation  
 Contract Laboratory Program of the EPA, 85  
 groundwater monitoring, 21
- Pesticide analytical methods, 198
- Purge and trap, 173, 185
- S
- Sediments, 132
- Semivariogram, 45
- Semi-volatile organic analysis, 143, 157
- Smelter pollution, 57
- Soil  
 dioxin testing, 132  
 matrix, 112, 157, 185  
 monitoring system design, 43  
 sampling, 35, 43, 57  
 spatial statistics, 43
- Spatial statistics, 43
- Spatial structure, 57
- Special Analytical Services of the EPA, 74
- Standards  
 ambient concentration, 21  
 Contract Laboratory Program of the EPA (See Superfund Contract Laboratory Program)  
 internal, 143, 163, 173
- Superfund Contract Laboratory Program  
 analytical methods, 74  
 dioxin analysis, 132  
 document control and chain of custody, 67  
 inorganic analytical methods, 103, 112  
 pesticide analysis, 198  
 quality assurance support, 85  
 semi-volatile organic analysis, 143, 157  
 volatile organic analysis, 173, 185

Surrogates, 143, 164, 173  
System performance check  
  compounds, 143, 173

## T

2,3,7,8-TCDD, 124, 132

## V

Volatile organic analysis,  
  173, 185

## W

Water (See also  
  Groundwater)  
  drinking water standards,  
    32  
  matrix, 112, 157, 185  
Wells  
  casing materials, 3  
  construction materials, 3  
  design, 3  
  drilling methods, 3  
  grouting, 15  
  monitor, 3
