Foreword

The Symposium on Metal Matrix Composites was presented in three sessions during the Seventieth Annual Meeting of the Society held in Boston, Mass., 25–30 June 1967. The symposium was sponsored jointly by the Division of Materials Sciences, Committee D-30 on Inorganic and High Modulus Fibers, and the U.S. Air Force Materials Laboratory. The symposium chairman was J. A. Herzog, U.S. Air Force Materials Laboratory. Presiding at the three sessions, as session co-chairmen, were P. D. Gorsuch, General Electric Co.; R. C. Jones, Massachusetts Institute of Technology; and Mr. Herzog.

Contents

Introduction	1
The Technical Potential for Metal Matrix Composites—H. M. BURTE AND C. T. LYNCH	3
Influence of Specimen Fabrication on Mechanics and Properties of Metal Composites	
Fabrication and Evaluation of Sapphire Whisker Reinforced Aluminum Composites—R. L. MEHAN	29
The Effect of Fiber Orientation and Morphology on the Tensile Be- havior of Al ₃ Ni Whisker Reinforced Aluminum—F. D. GEORGE, J. A. FORD, AND M. J. SALKIND	59
<i>In Situ</i> Measurements of Deformation Behavior of Individual Phases in Composites by X-Ray Diffraction—H. P. CHESKIS AND R. W. HECKEL	76
Discussion	91
Micromechanics and Microstrains of Metal Composites	
Microstrain Behavior of Metal-Matrix Composites—M. R. PINNELL, D. R. HAY, AND A. LAWLEY	95
The Mechanical Behavior of Aluminum-Boron Composite Material— W. F. STUHRKE	108
Discussion	133
Plastic Yielding and Strain Distribution in Filament-Reinforced Metals—J. R. HANCOCK AND J. C. GROSSKREUTZ	134
Discussion	149
Micromechanics of Boron Filament Reinforced Aluminum Composites —E. M. LENOE	150
Yield and Fracture Studies on Metal Composites	
Mechanical Behavior of a Fiber Reinforced Metal and Its Effect Upon Engineering Applications—D. CRATCHLEY, A. A. BAKER, AND P. W. JACKSON	169
Deformation of Wire Reinforced Metal Matrix Composites—R. C. JONES	183
Evaluating Potential Fatigue Performance of Composites (Cu/W and Cu/Mo) from Microstructural Behavior—R. G. GATES AND W. A. WOOD	218

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
