Subject Index

A
adjuvants, 138-146
aerosol particle size, 103-124
alkyl polyglucosides, 95-102
amide, 41-51
ammonium sulfate, 138-146
area-wide, 52-62

B
botanicals, 52-62

C
caprylic acid, 63-71
citric acid, 63-71
climate change, 166-178
concentrates (SCs), 3-29

D
desiccant, 63-71
dispersant, 72-91
dispersibility, 72-91
drift, 166-178, 179-195
drift control, 103-124
drift reduction, 103-124
drift reduction technology, 149-165, 166-178, 179-195
droplet sizing, 166-178
DRT, 166-178, 179-195

E
Easy-Sperse® P-20, 3-29
emulsion, 30-40
emulsifiers, 30-40, 63-71
emulsifiable concentrates (ECs), 3-29
ester, 41-51

F
fluorescent tracer, 125-137
formulation, 72-91

G
glyphosate, 103-124, 138-146

H
Hansen solubility parameters, 41-51
HLB, 30-40
hydroxypropyl guar, 149-165

I
insecticide, 52-62
irrigation, 95-102

L
light scattering, 72-91

M
micro-emulsion matrices, 3-29
modified guar, 149-165
morphology, 72-91

N
NPE, 30-40
O
oil dispersion, 149-165
oil flowable, 149-165

P
pesticide, 41-51
polymer composites, 3-29
polymeric surfactant, 72-91
polymer–surfactant interactions, 3-29

R
renewable resources, 3-29

S
seed oils, 30-40
self-emulsifying oil, 3-29
soil, 95-102
solubility, 41-51
solvent, 30-40, 41-51
solvent-based formulations, 3-29
solvent pairs, 3-29
spray deposition, 125-137
spray drift, 103-124

Spray drift, 149-165
spray droplet sizing, 179-195
styrene-acrylic copolymer, 72-91
suspension, 3-29
susceptibility, 3-29, 72-91

T
tank mix adjuvant, 103-124
terpenes, 52-62
tick, 52-62
tracer dye, 125-137

W
water conditioner, 138-146
water repellency, 95-102
water-dispersible granule, 72-91
water-dispersible granule (WDG), 3-29
wetting agents, 95-102
wettable powder, 72-91

Z
zero volatile organic component (VOC)
aqueous formulations and solids, 3-29
