Foreword

The Symposium on Ignition, Heat Release, and Noncombustibility of Materials was held 6 October 1971 at the National Academy of Sciences, Washington, D.C. Subcommittee 10 on Research of ASTM Committee E-5 on Fire Tests of Materials and Construction, with the assistance of the Committee on Fire Research of the National Academy of Sciences National Research Council, sponsored the symposium. A. F. Robertson, National Bureau of Standards, presided as symposium chairman.

Contents

Introduction	1
A Code Official's View of Requirements for Noncombustible Building Materials – <i>J. E. Bihl</i>	3
Perspective on Methods of Assessing Fire Hazards in Buildings – <i>J. E. Ryan</i>	11
Noncombustibility: A Marine View – <i>D. E. McDaniel</i>	24
The Belgian Point of View on Testing Reaction to Fire of Building Materials – <i>R. Minne</i>	35
Self-Heating and Thermal Ignition – A Guide to Its Theory and Application – <i>P. H. Thomas</i>	56
The Crucible Test Method for Defining Noncombustible Materials – <i>G. Bellisson</i>	83
Noncombustibility – Its Definition, Measurement, and Applications – <i>G. A. Herpol</i>	99
Predicting Limits for Safe Application of Combustible Materials – <i>C. J. Hilado</i>	112
Heat Release Rate of Building Materials – <i>E. E. Smith</i>	119
Development of a Heat Release Rate Calorimeter at NBS – <i>W. J. Parker and M. E. Long</i>	135
General Discussion – <i>Ove Pettersson</i>	152
General Discussion – <i>H. L. Malhotra</i>	164
