THE MEASUREMENT OF THE DYNAMIC PROPERTIES OF ELASTOMERS
Forward

The Symposium on the Measurement of Dynamic Properties of Elastomers and Elastomeric Mounts was presented at the SAE Automotive Engineering Congress held in Detroit, Michigan, January 8-12, 1973. The Symposium was jointly sponsored by the Society of Automotive Engineers and the American Society for Testing and Materials. This symposium was primarily a result of the efforts of the symposium organizers A. F. Hegerich, Ford Motor Co., and B. M. Hillberry, Purdue University, with support of several members of the SAE-ASTM Technical Committee on Automotive Rubber (TCAR), Section 11.65, who contributed as authors. Alfred F. Hegerich served as the symposium chairman and B. M. Hillberry served as co-chairman and editor of the proceedings.
