Foreword

The Symposium on Contributions of Basic Heat Transmission Measurements to the Design and Behavior of Thermal Insulation Systems was held at the American Society for Testing and Materials Headquarters in Philadelphia, Pa., on 16-17 April 1973. The symposium was sponsored by ASTM Committee C-16 on Thermal and Cryogenic Insulating Materials. R. P. Tye, Dynatech R/D Company, presided as the symposium chairman.

Contents

Introduction

Definitions and Thermal Modelling

What Property Do We Measure—ASTM Subcommittee C16.30 5
Measurement Philosophy of Subcommittee C16-30 5
Heat Transfer 7
The Necessity of Multiple Measurements 9
Recommendations for Future Changes 11
Establishing Steady-State Thermal Conditions in Flat Slab Specimens—
C. J. Shirtliffe 13
Basic Problem 15
Common Factors in Models 15
Model Descriptions and Solutions 15
Simplification of Solutions 16
Truncation of Solutions 17
Inversion of the Solutions 22
Comparison of Settling Times 23
Accuracy of Equations 24
Conclusions 24
Mechanisms of Heat Transfer in Permeable Insulation and Their Investi-
gation in a Special Guarded Hot Plate—C. G. Bankvall 34
Measurement of Heat Transfer 35
The Guarded Hot Plate 35
Heat Transfer Mechanisms in Fibrous Insulation 40
The Natural Convective Heat Transfer 43
Summary 48
Water Vapor Diffusion and Frost in Porous Materials—A. Auracher 49
Diffusion in Porous Frost-Containing Materials 50
Diffusion on Simple, Frost-Containing Pore Models 51
Diffusion in Frost-Containing Sphere Packings 61
Discussion 66
Conclusion 67
Radiative Contribution to the Thermal Conductivity of Fibrous Insula-
tions—R. M. F. Linford, R. J. Schmitt, and T. A. Hughes 68
Nomenclature 69
Theoretical Models for Radiant Heat Transfer 70
Experimental Approach 75
Experimental Results 78
Calculation of the Radiation Transmission Component 82
Conclusions 83
Predicting Spacecraft Multilayer Insulation Performance from Heat Trans-
fer Measurements—L. D. Stimpson and W. A. Hagemeyer 85
System-Level MLI Blanket Results 87
Types of Calorimeters Used 89
The JPL Test Program 90
Discussion of Future MLI Requirements
Conclusions

Techniques

Design Criteria for Guarded Hot Plate Apparatus—F. De Ponte and P. Di Filippo
