RUBBER and RELATED PRODUCTS: New Methods for Testing and Analyzing

STP 553

AMERICAN SOCIETY FOR TESTING AND MATERIALS
RUBBER AND RELATED PRODUCTS: NEW METHODS FOR TESTING AND ANALYZING

A symposium presented at the Seventy-sixth Annual Meeting AMERICAN SOCIETY FOR TESTING AND MATERIALS Philadelphia, Pa., 24-29 June 1973

ASTM SPECIAL TECHNICAL PUBLICATION 553
W. H. King, chairman
T. H. Rogers, symposium moderator

List price $20.25

Glossary of Terms Relating to Rubber and Rubber Technology, STP 184 A (1972), $10.00 04-184001-20

Measurement of the Dynamic Properties of Elastomers and Elastomeric Mounts, STP 535 (1973), $24.00 04-535000-20
Contents

Introduction

Morphological Analysis of Carbon Black—W. M. HESS AND G. C. MCDONALD

Electron Microscope Size Determinations

Automated Image Analysis

Experimental Procedures

Results

Discussion

Standardization of Mooney Viscometer and Oscillating-Disk Cure Meter—G. E. DECKER AND R. D. STIEHLER

Temperature of the Rubber in the Die Cavity

Friction Between Stem of Disk or Rotor and Lower Die

Slippage at the Rubber-Metal Interface

Pressure on the Rubber During Test

Scale Calibration

Conclusions

Measuring Dynamic Properties of Vulcanizates—W. C. WARNER

Nomenclature

Two Components of Complex Modulus

Three Regions of Modulus as a Function of Temperature or Rate

Four Elastic Constants of Rubber

Shear Vibrometer

Equation of Motion of a Spring-Dashpot-Mass Model

Parallelism of Complex Modulus and Complex Spring Rate

Separation of the Observed Total Dynamic Stress into Components

Three Types of Dynamic Tests

Forced Vibration Resonant Systems

Forced Vibration Nonresonant Systems

Compounding and Engineering with Rubber

Discussion

Plasticity Retention Index—Its Measurement and Significance for Natural Rubber—K. M. LOKE

Measurement of PRI

Factors Affecting Measurement of PRI

Reproducibility of PRI Test

Factors Influencing PRI of Raw Natural Rubber

Consequential Effects of PRI

Conclusion
