REPRODUCIBILITY AND ACCURACY OF MECHANICAL TESTS

A symposium sponsored by ASTM Committee E-28 on Mechanical Testing
AMERICAN SOCIETY FOR TESTING AND MATERIALS
St. Louis, Mo., 5 May 1976

ASTM SPECIAL TECHNICAL PUBLICATION 626
J. M. Holt, symposium chairman
NOTE

The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
Foreword

The Symposium on Reproducibility and Accuracy of Mechanical Tests was presented at a meeting held in St. Louis, Mo., 5 May 1976. The symposium was sponsored by the American Society for Testing and Materials through its Committee E-28 on Mechanical Testing. J. M. Holt, U. S. Steel Corporation, presided as symposium chairman.

A Note of Appreciation
to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction

Effect of Specimen Taper and Machining Processes on Tension Test
   Results—A. K. Schmieder 3
   Source of Specimens 5
   Preparation of Specimens 6
   Testing Procedure 8
   Results 9
   Discussion 15
   Conclusions 19

Variables Affecting Reproducibility of the Instrumented Impact Test—
   P. T. Lum and C. H. Curl 21
   Materials and Test Procedure 22
   Results and Discussion 24
   Conclusions 30

Pullout Strength of Concrete—Owen Richards 32
   Reproducibility and Accuracy 33
   Examples of Pullout Precision and Correlation to Other Tests 38

Product Form Variability in the Mechanical Behavior of Type 304
   Stainless Steel at Room Temperature and 593°C (1100°F)—
   R. W. Swineman, W. J. McAfee, and V. K. Sikka 41
   Material 43
   Variability of Hardness and Grain Size 45
   Tensile Properties 46
   Discussion 55
   Conclusions 59

Variations in Tensile Behavior of a High-Strength Titanium Alloy
   Fabricated and Heat Treated in a Heavy Section—
   R. E. Pasternak and R. Chait 65
   Materials 66
   Results and Discussion 68
   Conclusions 76

Variation in Mechanical Properties of Carbon Steel Plates and
   Wide Flange Shapes—D. C. McCune 78
   The Surveys 79
   Method of Analysis 84
   Results 88
   Summary 88

Use of the Short-Beam Shear Test for Quality Control of
   Graphite-Polyimide Laminates—W. W. Stinchcomb,
   E. G. Henneke, and H. L. Price 96
   Fabrication of Graphite-Polyimide Laminates 97
   The Short-Beam Shear Test 100
   Modified Quality Control Procedures 103
   Experimental Results 104
   Summary 108
