Foreword

This special technical publication, Formability Topics—Metallic Materials, contains papers presented at the 1977 Symposium on Formability, held in Toronto, Canada, on 4 May 1977. The symposium was sponsored by the American Society for Testing and Materials through its Committee E-28 on Mechanical Testing. B. A. Niemeier, Reynolds Metals Company, and A. K. Schmieder, General Electric Company, presided as cochairmen of the symposium; B. A. Niemeier and J. R. Newby, Armco Steel Corporation, served as editors of this publication.

A Note of Appreciation
To Reviewers

This publication is made possible by the authors and, also, the unheard efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction
Formability Testing and Deformation Analysis of Steel Sheet—
   J. R. Newby 4
Formability of Aluminum Alloys Using Cup Tests—F. V. Gricus
   and O. E. Drittl er 39
Formability and Fracture of Some Higher Strength Aluminum
   Alloys—R. Sowerby and B. K. Sareen 49
Bending and Springback of Aluminum Alloy Sheet and Plate—
   R. L. Rolf and E. P. Patrick 65
Predicting Sheet Anisotropy from the Fracture Angle of Tension
   Specimens—D. J. Lege 86
Stress-Peen Straightening of Complex Machined Aircraft Parts—
   R. D. Skinner 100
Development of Forming Limit Curves for Aerospace Aluminum
   Alloys—T. L. Hursman 122
High-Strength Steels—Formability and Applications—S. Dinda
   and A. S. Kasper 150
Use of Calcium in Inclusion Shape Control of High-Strength,
   Low-Alloy Steels Produced by the Direct Reduction-Electric
   Furnace Process—P. R. Hastings and Romain Drolet 161
Relationship Between Microstructure and Formability in Two
   High-Strength, Low-Alloy Steels—M. S. Rashid and
   E. R. Cprek 174
Determination of Ductility for Bulk Deformation—S. M. Woodall
   and J. A. Schey 191
Workability Testing and Analysis for Bulk Forming Processes—
   H. A. Kuhn 206
Relationship Between Surface Characteristics and Galling Index of
   Sheet Steel—R. R. Hilsen and L. M. Bernick 220
Discussion
Analysis of Sheet Metal Forming to Axisymmetric Shapes—S. Levy,
   C. F. Shih, J. P. D. Wilkinson, P. Stine, and
   R. C. McWilson 238
Summary 261
Index 267
