THERMAL TRANSMISSION MEASUREMENTS OF INSULATION

R. P. Tye, editor

ASTM
STP 660
AMERICAN SOCIETY FOR TESTING AND MATERIALS
THERMAL TRANSMISSION MEASUREMENTS OF INSULATION

A symposium sponsored by ASTM Committee C-16 on Thermal and Cryogenic Insulating Materials

AMERICAN SOCIETY FOR TESTING AND MATERIALS

ASTM SPECIAL TECHNICAL PUBLICATION 660
R. P. Tye, Dynatech R/D Company editor

List price $39.50
04-660000-10

Thermal Insulating Covers for NPS Piping, Vessel Lagging and Dished Head Segments, C 450 Adjunct (1965), $6.25, 12-304500-00
A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction 1

REFERENCE MATERIALS

Reference Materials for Insulation Measurement Comparisons 7

An Interlaboratory Comparison of the ASTM C 335 Pipe Insulation Test—MARION HOLLINGSWORTH, JR. 50

Does the Insulation Have a Thermal Conductivity? The Revised ASTM Test Standards Require an Answer—C. M. PELANNE 60

MATERIALS AND STRUCTURES

Natural Convective Heat Transfer in Permeable Insulation—C. G. BANKVALL 73

Measurement of the Thermal Resistance of Thick Low-Density Mineral Fiber Insulation—M. DEGENNE, S. KLARSFELD, AND M-P. BARTHE 130

LINE SOURCE METHODS FOR INSULATIONS

Analysis of the Applicability of the Hot-Wire Technique for Determination of the Thermal Conductivity of Diathermanous Materials—H. A. FINE 147

Thermal Conductivity Measurements on High-Temperature Fibrous Insulations by the Hot-Wire Method—A. J. JACKSON, J. ADAMS, AND R. C. MILLAR 154
Thermal Conductivity of Refractories: Working with the Hot-Wire Method—P. JESCHKE

Determination of the Thermal Conductivity of Refractory Insulating Materials by the Hot-Wire Method—W. R. DAVIS

PARAMETERS AFFECTING THERMAL PERFORMANCE

Heat Transfer Versus Pitch Angle for Nonventilated, Triangular-Sectioned, Apex-Upward Air-Filled Spaces—T. J. THIRST AND S. D. PROBERT

Laboratory and Field Investigations of Moisture Absorption and Its Effect on Thermal Performance of Various Insulations—F. J. DECHOW AND K. A. EPSTEIN

HEAT TRANSMISSION MODELS AND MEASUREMENTS

Light Transmission Measurements Through Glass Fiber Insulations—C. M. PELANNE

Fibrous Insulation Heat-Transfer Model—C. R. KING

Heat Transfer in Refractory Fiber Insulations—A. H. STRIEPENS

Pipe Insulation Testers—S. H. JURY, D. L. McELROY, AND J. P. MOORE

SYSTEMS EVALUATION

A Calibrated/Guarded Hot-Box Test Facility—R. G. MILLER, E. L. PERRINE, AND P. W. LINEHAN

New High-Temperature Guarded Hot-Box Facility for Reflective Insulation—H. W. WAHLE, D. A. RAUSCH, AND B. A. ALLMON

A Calibrated Hot-Box Approach for Steady-State Heat-Transfer Measurements in Air Duct Systems—T. L. LAUVRAY

Other Parameters and Measurements

Forced Convection: Practical Thermal Conductivity in an Insulated Structure Under the Influence of Workmanship and Wind—C. G. Bankvall

Draft Measurement Technique Applied to Poor Conductors—T. Ashworth, W. G. Lacey, and E. Ashworth
