ASTM Publications

Surface Texture Versus Skidding, STP 583 (1975), $12.00, 04-583000-37

An Analysis of the Literature on Tire-Road Skid Resistance, STP 541 (1973), $5.50, 04-541000-37

Skid Resistance of Highway Pavements, STP 530 (1973), $12.25, 04-530000-37

Annual Book of ASTM Standards, Part 15, Road and Paving Materials; Bituminous Materials for Highway Construction, Waterproofing and Roofing, and Pipe; Skid Resistance (1979), $38.00, 01-015079-08

Annual Book of ASTM Standards, Part 38, Rubber Products, Industrial—Specifications and Related Test Methods; Gaskets; Tires (1979), $29.00, 01-038079-20
A Note of Appreciation

to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge their contribution with appreciation.

Contents

Introduction 1

Challenges Facing Tire Cord Engineers Today—C. Z. DRAVES, JR. AND LEONARD SKOLNIK 3

Survey of Mechanical Properties of Steel Cord and Related Test Methods—L. BOURGOIS 19

Steel Tire Cord—Low Load Elongation—A. C. LOWELL AND LEONARD SKOLNIK 47

A Shorter Route to Steel Tire Cord—F. R. COWLISHAW 57

Steel Cord: Analysis of Used Truck Tires and Simulation of the Found Phenomena in Laboratory Experiments—C. C. J. DE JONG 69

Adhesion of Steel Tire Cord to Rubber Compounds Mutual Influence of Brass and Rubber Compounds on the Adhesion—M. P. BOURRAIN 87

Belt Test for the Evaluation of the Fretting Fatigue and Adhesion Behavior of Steel Cord in Rubber—L. BOURGOIS 103

Laboratory Machine to Evaluate the Resistance of Tire Cords (Textile or Steel) to Tensile Fatigue or Compressive Fatigue or Both—CESARE CANEVARI AND A. G. LALA 110

Degradation of Adhesion of Coated Tire Cords to Rubber by Atmospheric Pollutants—R. E. HARTZ AND H. T. ADAMS 139

Dynamic Moduli of Continuous Filament Yarns Subjected to Low Frequency Excitation Superimposed on High Initial Longitudinal Strain—
C. F. ZOROWSKI AND Z. P. SMITH 163

Role of Tire Reinforcements on Composite Static and Dynamic Characteristics—J. J. VORACHEK 180

Study of Fiber Fracture and Interfacial Chemistry Using the Scanning Electron Microscope—A. G. CAUSA 200

Viscoelastic Properties of Tire Cords Under Conditions of Rolling Tires—
Y. D. KWON, R. K. SHARMA, AND D. C. PREVORSEK 239

Relative Importance of Cords and Rubber in Tire Rolling Resistance—
R. K. SHARMA, Y. D. KWON, AND D. C. PREVORSEK 263

Design of Radial Passenger Tires with Aramid Cord Belts—D. F. RYDER 284

Bias Passenger Tires: Effect of Construction on the Cord Deformation and Temperature Rise During Rolling—D. C. PREVORSEK,
C. W. BERINGER, Y. D. KWON, AND R. K. SHARMA 298
