advanced in this publication.
Foreword

The symposium on Test Methods and Design Allowables for Fibrous Composites was held in Dearborn, Michigan, 2,3 October 1979. The symposium was sponsored by the American Society for Testing and Materials' through its Committee D-30 on High Modulus Fibers and Their Composites. C. C. Chamis, NASA Lewis Research Center, presided as chairman of the symposium and editor of this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction 1

New and Special Test Methods

A Single-Ply Transverse Tension Strength Test for Unidirectional Composites—R. L. FOYE 5

Application of Four-Point Ring-Twist Test for Determining Shear Modulus of Filamentary Composites—L. B. GRESZCZUK 21

Compression Testing of Graphite/Epoxy Composite Materials—R. K. CLARK AND W. B. LISAGOR 34

Low-Velocity Impact Tests on Fibrous Composite Sandwich Structures—A. V. SHARMA 54

Special Test Methods and Analysis

On the Off-Axis and Angle-Ply Strength of Composites—R. Y. KIM 91

Biaxial Testing of Graphite/Epoxy Laminates with Cracks—I. M. DANIEL 109

An Evaluation of the Sandwich Beam Compression Test Method for Composites—M. J. SHUART 152

Stress Distribution in Sandwich Beams in Uniform Bending—N. J. SALAMON 166

Design Allowables

Developing Design Allowables for Composite Helicopter Structures—M. J. RICH AND D. P. MAASS 181
