Foreword

The Fifth International Conference on Zirconium in the Nuclear Industry was held 4–7 Aug. 1980 in Boston, Massachusetts. The conference was sponsored by the American Society for Testing and Materials’ Committee B-10 on Reactive and Refractory Metals and Alloys in cooperation with the American Nuclear Society. D. G. Franklin, Electric Power Research Institute, served as editor of this publication.

Program planning was performed by representatives of the ASTM Subcommittee B10.02 on Zirconium and Hafnium. T. P. Papazoglou, Babcock and Wilcox Co., served as conference chairman, Erich Tenckhoff, Kraftwerk Union, as cochairman, and D. G. Franklin as editorial chairman.

A Note of Appreciation
to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.
