Foreword

The symposium on Rolling Contact Fatigue Testing of Bearing Steels was held on 12-14 May 1981 in Phoenix, Ariz. Sponsoring the event was ASTM Committee A-1 on Steel, Stainless Steel, and Related Alloys and its Subcommittee A01.28 on Bearing Steels. The chairman of the symposium was J. J. C. Hoo, Acciaierie e Ferriere Lombarde Falck and Acciaierie di Bolzano, who also served as editor of this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.
