SIGNIFICANCE OF TESTS FOR PETROLEUM PRODUCTS

BOLDT/HALL

AMERICAN SOCIETY FOR TESTING AND MATERIALS
NOTE

The Society is not responsible, as a body,
for the statements and opinions
advanced in this publication.
Foreword

This book has been developed through the joint efforts of the American Society for Testing and Materials (ASTM) and the Institute of Petroleum (IP). ASTM, particularly its Committee D-2 on Petroleum Products and Lubricants, and IP are long-established sources of standard testing and evaluation methods for petroleum and petroleum products. Many of these standard methods are accepted internationally as-yardsticks for the determination of product quality.

The purpose of this volume is to provide an informative reference text on the significance of ASTM and IP test results that are used in commercial transactions to definitively describe petroleum raw materials and petroleum products. To ensure orderly treatment, separate chapters have been prepared for each major raw material or end product. The general approach in each chapter is as follows:

(a) A definitive description of the raw material or product is presented along with its known or prospective use applications.

(b) The primary quality characteristics that define the material in those use applications are outlined.

(c) The particular tests and analytical procedures applicable to the quality assessment for the material are indicated.

(d) Suggestions for further reading are listed.

Each chapter has been written as an entity. Since many tests are applicable to several products, this results in a certain amount of repetition. Repetition was believed to be preferable to elaborate cross referencing.

Although this book will be revised periodically, there will be no assurance that the test methods or specifications cited are current. Up-to-date standards can be found in the appropriate volumes of the Annual Book of ASTM Standards and IP Standards for Petroleum and Its Products.

Acknowledgments

This volume has been developed over a number of years through the joint efforts of the American Society for Testing and Materials and the Institute of Petroleum. In the process, chapters have been written, revised, and rewritten until it became difficult to distinguish between author, reviewers, and editors. Hopefully, the following list of acknowledgments includes all who contributed to the process.

Editors
Kenneth Boldt Union Oil Company of California
B. R. Hall American Petroleum Institute

Associate Editor
W. D. Dysart Union Oil Company of California

Crude Oils
J. O'Donnell BP Research Centre, U.K.
C. E. Webber Sun Oil Company

Gaseous Fuels and Light Hydrocarbons
R. E. Cannon Gas Processors Association
C. A. Munson Petro-Tex Chemical Corp.
F. W. Selim Phillips Petroleum Co.

Petroleum Solvents
D. M. Fenton Union Oil Company of California
A. J. Goodfellow Carless, Capel and Leonard Ltd., U.K.
J. F. Hickerson Exxon Company, U.S.
S. A. Yuhas Exxon Chemicals

Automotive Gasoline
K. A. Boldt Union Oil Company of California
J. A. English Chevron Research Co.
R. L. Everett General Motors Corp.
S. T. Griffiths The Associated Octel Co., Ltd., U.K.
H. R. Porter Standard Oil Company of California
J. H. Macpherson Chevron Research Co.

Aviation Fuels
W. G. Dukek Exxon Research and Engineering Co.
R. I. Gottshall Gulf Research and Development Co.
D. T. McAllan BP Research Centre, U.K.
A. G. Robertson Shell International Petroleum Co., Ltd., U.K.

Diesel Engine and Nonaviation Gas Turbine Fuels
G. K. Brower International Harvester Co.
W. H. Kite, Jr. Exxon Research and Engineering Co.
J. A. McLain Caterpillar Tractor Company
R. E. Pegg Esso Research Centre, U.K.
C. C. Ward U.S. Department of the Interior,
  Bureau of Mines

Heating and Power Generation Fuels
  J. R. Callaway Texaco, Inc.
  W. H. Kite, Jr. Exxon Research and Engineering Co.
  N. J. Schlesser Atlantic Richfield Company
  G. G. Stephens BP Research Centre, U.K.

Lubricating Oils
  J. B. Berkley Mobil Oil Company, Ltd., U.K.
  J. W. Gaynor Amoco Oil Co.

Lubricating Greases
  R. S. Barnes Amoco Chemicals Corp.
  E. A. Goodchild Hoffman Manufacturing Co., Ltd., U.K.
  A. T. Polishuk Sun Oil Company

Petroleum Waxes, Including Petrolatums
  R. I. Gottshall Gulf Research and Development Co.
  C. F. McCue Esso Research Centre, U.K.
  G. A. Weisgerber Exxon Research and Engineering Co.

White Mineral Oils
  V. Biske Burmah Oil Trading, Ltd., U.K.
  C. F. W. Gebelein Pennsylvania Refining Co.

Petroleum Oils for Rubber
  J. S. Sweely Sun Oil Company

Special acknowledgment is given to the Refining Department, American
Petroleum Institute for project sponsorship and to T. W. Legatski as the original
project coordinator.
