Foreword

The symposium on Validation and Predictability of Laboratory Methods for Assessing the Fate and Effects of Contaminants in Aquatic Ecosystems was held in Grand Forks, North Dakota, 8 Aug. 1983. The symposium was sponsored by The American Institute of Biology and The Applied and Aquatic Section of the Ecological Society of America and ASTM Committee E-47 on Biological Effects and Environmental Fate. Terence P. Boyle, National Park Service, presided as symposium chairman and editor of this publication.

A Note of Appreciation
to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.
