# Foreword

The papers in this publication, *Guarded Hot Plate and Heat Flow Meter Methodology*, were presented at a symposium held in Quebec, Canada, 8, 9 October 1982. The symposium was sponsored by ASTM Committee C-16 on Thermal Insulation and the National Research Council of Canada. C. J. Shirtliffe, National Research Council of Canada, and R. P. Tye, Dynatech R/D Company, are editors of this publication.

## A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.
