Foreword

The ASTM Symposium on The Use of Nonstandard Subsized Specimens for Irradiated Testing was held in Albuquerque, New Mexico, on 23 September 1983. Its sponsor was ASTM Committee E-10 on Nuclear Technology and Applications. W. R. Corwin, Oak Ridge National Laboratory, and G. E. Lucas, University of California - Santa Barbara, served as symposium chairmen and have edited this publication.

The title of this volume has been changed slightly from that of the symposium.

A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.
