NOTE
The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
Foreword

The Third International Symposium was sponsored by Alexandria University, ASTM Committee D-34 on Waste Disposal, the U.S. Environmental Protection Agency, the U.S. Agency for International Development, and the United Nations Economic Commission for Western Asia. Richard A. Conway, Union Carbide Corporation, Ahmed Hamza, Alexandria University, and William Lacy, U.S. Environmental Protection Agency, served as chairmen of the symposium and are editors of the resulting publication.

The Symposium on Environmental Test Method Development was sponsored by ASTM Committee D-34 on Waste Disposal. Douglas Lorenzen, Pennsylvania Department of Environmental Resources, and Cary L. Perket, Environmental Engineering and Management Limited, served as chairmen of the symposium and are editors of the resulting publication.

Larry P. Jackson, Western Research Institute, also served as editor of this publication.
A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.

Contents

Introduction 1

CONTAMINANT AND LEACHING ASSESSMENTS

Leaching Test Characterization of Iron and Steel Industry Waste—JÜRGEN A. PHILIPP, RALF ENDELL, JEAN RAGUIN, AND OLIVER DECHELETTE 7

Comparison of Leachate Quality in Foundry Waste Landfills to Leach Test Abstracts—ROBERT K. HAM, WILLIAM C. BOYLE, AND FRANK J. BLAHA 28

Testing Methodologies for Landfill Codisposal of Municipal and Industrial Wastes—FREDERICK G. POHLAND AND JOSEPH P. GOULD 45

An Approach for Evaluating Long-Term Leachability from Measurement of Intrinsic Waste Properties—PIERRE CÔTÉ, TREVOR R. BRIDLE, AND ANDREW BENEDEK 63

Use of an Upflow Column Leaching Test to Study the Release Patterns of Heavy Metals from Stabilized/Solidified Heavy Metal Sludges—TODD M. BROWN, PAUL L. BISHOP, AND DAVID L. GRESS 79

GROUND WATER AND CONTAMINANT MIGRATION ASSESSMENTS

Leachate Migration Through Clay Below a Domestic Waste Landfill, Sarnia, Ontario, Canada: Chemical Interpretation and Modelling Philosophies—ROBERT M. QUIGLEY AND R. KERRY ROWE 93
Low-Cost Data Management for Protection of Ground-Water Resources: The Importance of Quality Assurance—WILLIAM B. DE VILLE AND JANE A. MALLOY 104

Pentachlorophenol Adsorption on Soils and Its Potential for Migration into Ground Water—SHANKHA K. BANERJI, K. PIONTEK, AND JOHN T. O'CONNOR 120

Sorption Kinetics of Competing Organic Substances on New Jersey Coastal Plain Aquifer Solids—CHRISTOPHER G. UCHRIN AND JACK KATZ 140

Principles of Bioreclamation of Contaminated Ground Water and Leachates—GENE F. PARKIN AND CRAIG R. CALABRIA 151

Incineration of Hazardous Waste

Performance Assessment of Incinerators and High-Temperature Industrial Processes for Disposing of Hazardous Waste in the United States—E. TIMOTHY OPPELT 177

Liner Assessments

Use of Flexible Membrane Liners for Industrial and Hazardous Waste Disposal—ROBERT M. KOERNER 195

Migration of Leachate Solution Through Clay Liner and Substrate—RAYMOND N. YONG, MOSTAFA A. WARITH, AND PRAPOTE BOONSINSUK 208

Effect of Pore Fluid pH on the Dynamic Shear Modulus of Clay—B. L. DU, G. K. MIKROUDIS, AND HSUI-YANG FANG 226

Site Monitoring and Assessment
