# Foreword

This publication, *Plasma Spectroscopy for the Analysis of Hazardous Materials: Design and Application of Enclosed Plasma Sources*, contains papers presented at the symposium on Use and Development of Enclosed Plasma Spectroscopic Sources for the Analysis of Toxic and Radioactive Materials, which was held 15 Jan. 1986, in New Orleans, LA. The event was sponsored by ASTM Committee C-26 on Nuclear Fuel Cycle. The symposium chairman was M. C. Edelson, of Ames Laboratory, Iowa State University, who also served as editor of this publication. J. Leland Daniel, Pacific Northwest Laboratory, served as co-editor.

## A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.

# Contents

<b>Introduction</b>	1
---------------------	---

## PRINCIPLES AND PLANNING

<b>ICP Source Optical Emission Spectroscopy Analysis of Radioactive Materials: A View of the United Kingdom Scene—</b> JOHN W. McMILLAN	5
Discussion	15
<b>Glove Box Enclosed D-C Plasma Source for the Determination of Metals in Plutonium Solutions—</b> WILLIAM F. MORRIS	16

## OPEN INSTALLATIONS

<b>A Simplified System for Doing ICP Analysis on Radioactive Samples—</b> J. J. McCOWN	35
Discussion	39
<b>Use of an Inductively Coupled Plasma Emission Spectrometer System in a Separations Process Plant Laboratory—</b> JOHN M. HILLER AND DANIEL H. LAWRY	41
Discussion	59
<b>Modification of an Inductively Coupled Plasma Atomic Emission Spectrometer for Analysis of Plutonium Impurities—</b> GLENDA E. BROWN	60
<b>Design for a Contained Inductively Coupled Plasma/D-C Arc Atomic Emission Spectrometer at the Savannah River Plant—</b> J. TODD COLEMAN	66

## ENCLOSED SOURCES

<b>Five Years of Plasma Emission Spectroscopy (ICP-AES) Analyses of Toxic and Radioactive Materials at the Bruyeres le Chatel Center in France—</b> CLAUDE BERGEY, XAVIER CLAUDON, AND FERNAND THOUZEAU	73
<b>The Ames Laboratory Facility for the Emission Spectroscopic Study of Alpha-Emitting Radionuclides: The Design and Operating History—</b> MARTIN C. EDELSON AND EDWARD L. DeKALB	83

<b>Adaptation of a Beckman Spectraspan VI Spectrometer to a Plutonium Glove box—ADRIAN P. LOVELL, GLENN E. BENTLEY, THOMAS K. MARSHALL, AND TERRY R. HAHN</b>	95
---	----

SHIELDED ENCLOSURES

<b>ICP-AES Radioactive Sample Analyses at Pacific Northwest Laboratory—CARRIE L. MATSUZAKI AND FRANK T. HARA</b>	109
Discussion	120

<b>The Los Alamos Facility for Inductively Coupled Plasma Atomic Emission Spectrometric Analysis of Radioactive Solutions— CHARLES T. APEL, TONY BEUGELSDIJK, DAVID GALLIMORE, WILLIAM H. MYERS, AND LYNDA FAIRES</b>	121
---	-----

HOT CELL INSTALLATIONS

<b>Remote Inductively Coupled Plasma Atomic Emission Spectrometry at the Idaho Chemical Processing Plant—RONALD W. STONE AND FRED W. DYKES</b>	131
Discussion	144

<b>Development and Layout of an ICP Excitation Unit in a Hot Cell— ELISABETH MAINKA, HANS G. MÜLLER, AND JÜRGEN NEUBER</b>	146
Discussion	155
