The papers and discussions in this Symposium on Testing of Cast Iron with SR-4 Type of Gage were presented at the Eighth and Ninth Sessions of the Fifty-second Annual Meeting of the American Society for Testing Materials, held in Atlantic City, N. J., June 29, 1949. The Symposium was sponsored by Committee A-3 on Cast Iron.

Mr. J. S. Vanick of The International Nickel Co., presided over the Eighth Session and Mr. H. Bornstein of the Deere Company, presided over the Ninth Session.
THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of A.S.T.M. publications and information on the work of the Society will be gladly furnished on request.
