Technical Committees

Technical Committees develop and maintain ASTM standards. They are grouped by designation according to related activities within a particular scope of work (ex: A01 on Steel, Stainless Steel and Related Alloys). ASTM Committees are made up of over 32,000 volunteers from industry and include manufacturers and consumers, as well as other interest groups such as government or academia. Any interested individual can participate on a Technical Committee through ASTM membership.

My D12 Work Items

You are a task group member on the Work Item(s), or WK(p) listed below. Where you serve as the Technical Contact, the WK(p) are shown in red.

D12.12 on Analysis and Specifications of Soaps, Synthetics, Detergents and their Components
  - D1568-05 Standard Test Methods for Sampling and Chemical Analysis of Alkylbenzene Sulfonates
    WK32612 Technical Contact: Sean Foredor
  - D2357-74(2003) Standard for Qualitative Classification of Surfactants by Infrared Absorption
    WK21515 Technical Contact: Sean Foredor

D12.15 on Physical Testing
  - Proposed: WK26383 Technical Contact: Anthony Hardaway
    WK35456 Technical Contact: Elizabeth Eggert

D12.16 on Hard Surface Cleaning
  - Proposed: WK28987 Technical Contact: Toni Lynch
  - Proposed: WK28302 Technical Contact: Kathleen Alford
  - D1280-00(2007) Standard Guide for Total Immersion Corrosion Test for Soek Tank Metal Cleaners
    WK39358 Technical Contact: Joseph Scheiblein
  - D7225-06 Standard Guide for Blood Cleaning Efficiency of Detergents and Washer-Disinfectors
    WK33135 Technical Contact: Keumudi Kulkarni
ASTM WK35455

Work Item: ASTM WK35455 - Revision of D4265 - 98(2007)e1
Standard Guide for Evaluating Stain Removal Performance in Home Laundering

Active Standard: D4265 - 98(2007)e1
Developed by Subcommittee: D12.15 | Committee D12 | Contact Staff Manager

1. Rationale

This guide is being revised to include:
- Focusing on stain removal evaluation of home laundry detergents only
- Updating the washing conditions
- Revising the SRI calculation to better reflect stain removal performance
- Broadening options for stain application, number of stains selected and types of stains tested

Interlaboratory Study Program

ASTM’s Board of Directors adopted plans, in the fall of 2004, to launch the Interlaboratory Study Program (ILS) as part of their continuing pursuit of excellence in standards development. Responding to the need for standards in the marketplace to be of known and documented quality, a commitment was made to fund the development of the ILS Program. This commitment means that ASTM has been able to assist those technical committees for which the prospect of implementing an interlaboratory study was either administratively daunting or financially impossible. The ultimate goal is to enhance the quality of ASTM standard test methods by aiding the Technical Committees as they develop Precision Statements backed by high quality laboratory data.

In order to support the committees in their efforts to produce precision statements for their test methods, so as to incorporate at least a repeatability statement, the ILS Program is available to assist with the following areas:

- Designing an Interlaboratory Study
- Identifying potential samples
- Soliciting volunteer laboratories
- Finding an available supplier
- Contracting with a distributor
- Reviewing laboratory instructions
- Reimbursing shipping expenses
- Collecting data
- Analyzing data
- Producing a draft precision statement
- Compiling information for the Research Report
- Recognition of participating labs

Once a Work Item has been registered (instructions here), new programs should be registered through the Interlaboratory Study (ILS) link in the My Tools section of the member’s MyASTM page, available after logging into ASTM’s website. Or simply click here: Register a new ILS study
Virtual Classroom for Members

ASTM International is pleased to offer a series of free one-hour online training workshops. For more details on each training session and to register, please click on the appropriate link(s) below. If you need more information or have any questions, please contact Kristy Straiton.

Training Sessions

- New Member Orientation & Training
- Balloting & Handling Negatives Votes
- WebEx Training
- Training on ASTM Online Tools
- Roster Maintenence
- Developing & Revising a Standard
- Responsibilities for Task Group Chair & Technical Contacts
- Interlaboratory Studies Program
- Website Navigation Videos

Feedback from attending a session
Schedule A Virtual Meeting or Conference Call

To schedule your Virtual Meeting or Conference Call, you will need the email addresses and company name of non-members you wish to invite. You will have the option to attach materials to circulate with the invitation (or you may send them later). Upon completion, you will receive confirmation of the session (including a list of emails for those you invite, for your use). Your scheduled sessions will be saved for 1 year, so you may review and/or retrieve their information. If you need your conference call or online meeting scheduled within the next 48 hours, please contact your staff manager directly.

Type of Collaborative Meeting and Sponsoring Committee
Would you like to retrieve information from a previous call or online meeting?
(This will pre-populate the form with previously submitted information)
