The 2002 Award for Outstanding Article published in the Journal of Testing and Evaluation during the previous year (2001) has been made to “J-Integral Evaluation of Single-Edge Notched Specimens under Mixed-Mode I/II Loading,” by C. Dalle Donne and A. Pirondi. The authors are from the Institute of Materials Research, German Aerospace Center DLR, Cologne, Germany, and the Department of Industrial Engineering, University of Parma, Parma, Italy, respectively.

The article was published in the Journal (2001), Vol. 29, No. 3, pp. 239–245. The selection was made by the members of the Editorial Board, acting for the ASTM Committee on Publications.

Donald R. Petersen
Editor-in-Chief
Letter from the Editor 263

Simulation and Prediction of Hardness Performance of Rockwell Diamond Indenters Using Finite-Element Analysis 265
L. Ma, S. Low, J. Zhou, J. Song, and R. deWit

Evaluating the CoreLok™ Measurement of Bulk Specific Gravity for Hot Mix Asphalt Samples 274
R. Alam Tarefder, M. Zaman, and K. Hobson

Experimental Evaluation of the Torsion Test for Determining Shear Strength of Structural Lumber 283
R. Gupta, L. R. Heck, and T. H. Miller

Finite-Element Analysis of the Stress Distribution in a Torsion Test for Determining Shear Strength of Full-Size, Structural Lumber 291
R. Gupta, L. R. Heck, and T. H. Miller

Fatigue Testing and Evaluation of Asphalt Binders Using the Dynamic Shear Rheometer 303
A. Shenoy

Use of Surfactants in Condom Water Leak Testing 313

Visualization of Localization in Grain Skeletons with Particle Image Velocimetry 322
K. Nübel and V. Weitbrecht

(Continued on Back Cover)
Investigation of Stress-Strain Relationship of Confined Concrete in Hollow Bridge Columns Using Neural Networks 330
Y. L. Mo, H. Y. Hung, and J. Zhong

Analytical Model for Fatigue Crack Propagation in Concrete 340
D. V. Ramsamooj

Retrieval and Interpretation of Crash-Related Data from Nonresponsive Electronic Control Units in Land Vehicle Systems 350
W. Rosenbluth and H. A. Adams

TECHNICAL NOTE

Evaluation of Bearing Capacity Improvement Using Composite Grids 362
G. L. Sivakumar Babu, B. M. Srinivasa Rao, and A. Sridharan
