Foreword

The Twenty-Second National Symposium on Fracture Mechanics was held on 26–28 June 1990 in Atlanta, Georgia. ASTM Committee E24 on Fracture Testing was the sponsor. The Executive Organizing Committee responsible for the organization of the meeting was composed of H. A. Ernst, Georgia Institute of Technology, who served as the symposium chairman, and the following vice-chairman: S. D. Antolovich, Georgia Institute of Technology; S. N. Atluri, Georgia Institute of Technology; J. S. Epstein, Idaho National Engineering Laboratory; D. L. McDowell, Georgia Institute of Technology; J. C. Newman, Jr., NASA Langley Research Center; I. S. Raju, North Carolina State A&T University; and A. Saxena, Georgia Institute of Technology. The proceedings have been divided into two volumes. H. A. Ernst, A. Saxena, and D. L. McDowell served as editors of Volume I and S. N. Atluri, J. C. Newman, Jr., I. S. Raju, and J. S. Epstein served as editors of Volume II.
Contents

Introduction

ELASTIC FRACTURE MECHANICS AND APPLICATIONS

Experimental Determination of Fracture Parameters in Three-Dimensional Problems—C. W. SMITH

Crack-Mouth Displacements for Semieliptical Surface Cracks Subjected to Remote Tension and Bending Loads—I. S. RAJU, J. C. NEWMAN, JR., AND S. N. ATLURI

Stress-Intensity Factors for Long Axial Outer Surface Cracks in Large R/T Pipes—R. B. STONESIFER, F. W. BRUST, AND B. N. LEIS

An Inverse Method for the Calculation of Through-Thickness Fatigue Crack Closure Behavior—D. S. DAWICKE, K. N. SHIVAKUMAR, J. C. NEWMAN, JR., AND A. F. GRANDT, JR.

ASTM E 1304, The New Standard Test for Plane-Strain (Chevron-Notched) Fracture Toughness: Usage of Test Results—L. M. BARKER

Application of the Weight-Functions Method to Three-Dimensional Cracks Under General Stress Gradients—S. N. MALIK

NONLINEAR FRACTURE MECHANICS AND APPLICATIONS

Crack-Tip Displacement Fields and $J_R$-Curves of Four Aluminum Alloys—M. S. DADKHAH, A. S. KOBAYASHI, AND W. L. MORRIS

Application of the Hybrid Finite Element Method to Aircraft Repairs—P. TONG, R. GREIF, AND LI CHEN

Three-Dimensional Elastic-Plastic Analysis of Small Circumferential Surface Cracks in Pipes Subjected to Bending Load—C. FRANCO AND P. GILLES 183

Elastic-Plastic Crack-Tip Fields Under History Dependent Loading—F. W. BRUST, J. AHMAD, AND S. NABOULSI 206

Experimental Study of Near-Crack-Tip Deformation Fields—F.-P. CHIANG, S. LI, AND Y. Y. WANG 225

An Engineering Approach for Crack-Growth Analysis of 2024-T351 Aluminum Alloy—I. GU 246

Three-Dimensional Analysis of Thermoelastic Fracture Problems—W. H. CHEN AND C. C. HUANG 274

NOVEL MATHEMATICAL AND COMPUTATIONAL METHODS

Discussion 313

Traction Boundary Integral Equation (BIE) Formulations and Applications to Nonplanar and Multiple Cracks—T. A. CRUSE AND G. NOVATI 314

Evaluation of Three-Dimensional Singularities by the Finite Element Iterative Method (FEIM)—R. S. BARSOUM AND T.-K. CHEN 333

An Analytical Solution for an Elliptical Crack in a Flat Plate Subjected to Arbitrary Loading—A.-Y. KUO, S. SHVARTS, AND R. B. STONESIFER 347

Application of Micromechanical Models to the Prediction of Ductile Fracture—D.-Z. SUN, R. KIENZLER, B. VOSS, AND W. SCHMITT 368

COMPOSITES MATERIALS

Matrix Cracks and Interphase Failure in Transversely Loaded Fiber Composites—H. ZHU AND J. D. ACHENBACH 381

Dynamic Stress-Intensity Factors for Interface Cracks in Layered Media—M. BOUDEN AND S. K. DATTA 395

Probabilistic Fracture Models for Predicting the Strength of Notched Composites—M.-C. CHENG AND K. Y. LIN 410
