Airflow Performance of Building Envelopes, Components, and Systems

Mark P. Modera and Andrew K. Persily, Editors

ASTM Publication Code Number (PCN):
04-012550-10
Foreword

This publication, Airflow Performance of Building Envelopes, Components, and Systems, contains papers presented at the symposium of the same name, held in Dallas/Fort Worth Airport, TX on 10–11 October 1993. The symposium was sponsored by ASTM Committee E–6 on Performance of Buildings and its Subcommittee E06.41 on Infiltration Performance. Mark P. Modera, Lawrence Berkeley Laboratory, University of California, Berkeley, and Andrew K. Persily, National Institute of Standards and Technology (NIST), U.S. Department of Commerce, served as co-chairmen of the symposium and are editors of the resulting publication.
Contents

Overview— 1

AIR MOVEMENT, VENTILATION, AND INDOOR AIR QUALITY

Measured Airflows in a Multifamily Building—L. PALMITER, J. HELLER, AND M. SHERMAN 7

Discussion 22

A Study of Ventilation Measurement in an Office Building—W. S. DOLS AND A. K. PERSILY 23

Discussion 46

Changes in Airtightness Levels of Six Office Buildings—C. Y. SHAW AND J. T. REARDON 47

The Effect of Varying Levels of Induced Duct Leakage on Differential Pressures in a Florida House—A. C. KOZIK, P. OPPENHEIM, AND D. HINTENLANG 58

Discussion 67

Assessing the Effectiveness of Slab Flooring as a Barrier to Soil Gas and Radon Infiltration—A. D. WILLIAMSON, C. S. FOWLER, AND S. E. McDONOUGH 68

Discussion 77

WINDOW AIR LEAKAGE

A Description of the New ASTM Test Method E 1424, Used for Measuring Fenestration Air Leakage at Differential Temperatures and Pressures—D. W. KEHRLI 81

Discussion 89
Whole House Fenestration Energy Consumption as a Function of Variable Window Air Leakage Rates—D. KEHRLI

Extraneous Air Leakage from Window Perimeters—M. J. LOUIS AND P. E. NELSON

Discussion

Air Leakage Characteristics of Various Rough-Opening Sealing Methods for Windows and Doors—G. PROSKIW

ENVELOPE HEAT AND MASS TRANSFER

Airflows and Moisture Conditions in Walls of Manufactured Homes—A. TENWOLDE, C. CARLL, AND V. MALINAUSKAS

An Analysis of Moisture Accumulation in the Roof Cavities of Manufactured Housing—D. BURCH

Discussion

Thermal Performance Characterization of Residential Wall Systems Using a Calibrated Hot Box with Airflow Induced by Differential Pressures—D. C. JONES, D. G. OBER, AND J. T. GOODROW

Discussion

ENVELOPE AND DISTRIBUTION SYSTEM LEAKAGE

Air Leakage in the Perspective of International Standards—P. A. LEVIN, D. J. WILSON, AND M. Y. ACKERMAN

Discussion

Measured Airtightness of 24 Detached Houses over Periods of up to Three Years—G. PROSKIW

Discussion

Uncertainties in Fan Pressurization Measurements—M. SHERMAN AND L. PALMITER

Discussion
Field Comparison of Alternative Techniques for Measuring Air Distribution System Leakage—M. P. MODERA
