Index

A

Absolute coil, 256
  Reduction of error, 260
Accuracy of defect measurements, 225
A-c field measurement
  Theoretical versus experimental results, 414
A-c field model for crack depth, 405
Adaptive learning, 485
  Defect data base, 488
  Experimental results, 491
  Signal processing for, 488
Algorithm, encircling coil on cylindrical conductor, 214
Alloy solubility limit, 164
Aluminum alloys, 189
Aluminum standards, drift rate, 100
Analytical solution (see Eddy current), 7
Anisotropy, in cold-drawn aluminum, 169
Artificial defect, 80

B

Boundary integral equation, 298
  Differences in application of, 303
  For solenoid around cylindrical conductor, 301
  Numerical solution of, 303

Brass standards, drift rate, 107
Bronze standards, drift rate, 107

C

Casting
  Defects in, 174
  Solidification effects, 180
Cladding test
  Multifrequency, 207
  Pulsed, 293
Coil, impedance (see Impedance)
Composite
  Defect model, 145
  Defects in, 141
  Fabrication, 140
  Graphite-aluminum, 140
  Materials, 140
Conductivity
  Effect on pulse shape, 132
  Measurement at low temperature, 157
  Spatially dependent model, 182
Conductivity standards
  Drift rate for various metals, 102-108
Conductivity variation, 111
Continuous casting, 173
Control defects, 80
Counter sink depth, 135
Crack depth
  A-c field model, 405
### EDDY-CURRENT CHARACTERIZATION OF MATERIALS

Theoretical versus experimental results, 414
Crack detection, 129
Crank-Nicolson solution, 25

#### D

Data acquisition, 393
Data base
- For adaptive learning, 488
- For pattern recognition, 466

Defect
- Classification, 480
- Composites, 241
- Effects on signal out, 230
- Electromagnetic field interaction in, 269, 271, 285
- Length, 82
- Reference standards for tubes, 81
- Resolution, 80
- Slot length, 82
- Standards, 80
- Tube, 83
- Type classification, 480

Defect characterization, theoretical problem, 6
Defect detection, in composites, 147
Defect interaction
- Errors in theoretical model, 280
- Experimental verification of model, 279
- Phase and size information, 281
- Signal versus orientation, 281

Defect signals
- Microwave, 354
- Multifrequency, 194

Depth of penetration
- Alternating currents, 402
- Pulsed fields, 374
- Differential coil, 256
- Field contours, 15
- Drilled hole, 80, 81

Eddy current, analytical solution
- Circular ring, 245
- Coaxial circular tube, 245
- History of, 7
- Magnet case, 252
- Square plate, two materials, 250
- Square plate with holes, 250
- Support plate, aluminum alloy, 248
- Support plate, steel, 249
- Toroidal vacuum vessel, 246

Eddy-current decay, 157
- Advantages of measurement, 160
- Limitations of measurement, 160
- Measurement of, 157
- Specimen preparation, 160
- Voltage-flux relationship in, 159

Eddy-current fields
- EDDYNET, 49
- Using finite element analysis, 60
- Edge margin, effect on pulse shape, 135

Electromagnetic field distribution
- For surface crack, 406
- For surface crack with circular arc, 410

Electromagnetic field formulation
- Electromagnetic scattering, 312
- Electroslag remelting, 173
- For eddy-current problems, 9, 23, 11, 70, 300, 406

End effect, 82
Eutectic liquid, 181

#### F

Facsimile recording, 450
- Of defects, 457
- Fastener height, effect on signal, 135
- Fast Fourier transform, 471
Fatigue crack, 348
Monitoring, 473
Ferromagnetic resonance probe, 343, 349
Finite difference analysis, 11
Finite element analysis, 12, 60, 22
Assumptions, 60
Basic description, 12
Boundary condition, 62
Energy functional, 12
Forcing function, 62
Instantaneous field equation, 24
Resistance determination, 62
State space, 26
Finite element discretization, 13
Flux density, changes in, 442
Laplace transform, 479
Flux leakage, 428
Analytical model, 436
Analytical model versus experiment, 442
Change in flux density, 442
Signals obtained, 428
Fracture analysis, 472

H
Heat exchanger, multifrequency test, 210, 226
Heat treatment, relation to conductivity, 95

I
IACS, 95
Impedance change
Calculation of, 70
During solidification process, 181
Impedance, finite element determination, 14
Inclusion, theoretical representation, 337

L
Least squares fitting, for multiple unknown parameters, 233
Lift-off, compensation, 124, 364
Lift-off, effect on pulse shape, 137
Linear addition of multifrequency signals, 281
Linear diffusion equation, 61
Linear discrimination function, 479
Line elements, current carrying, 49, 54
Loop currents, 243
Lorentz reciprocity relation, 333
Low-frequency inspection, 129

M
Magnetic diffusion equation, 159
Magnetic domain indicator, 90
Magnetic flux density by Laplace transform, 371
Magnetic inductor, 91
Magnetic saturation model, 87
Magnetic structure, 240
Material characterization, 39
Matthiessen's rule, 157
Measurement method, idealization, 322
Metal matrix composites, 146
Microwave, 311, 332, 348
  Comparison with low frequency, 353
  Defect signals, 332, 354
  Instrumentation, 352
Modeling
  Circuit equations, 242
  Coupled circuits, 87
  Current carrying line elements, 24, 54
  Curved shell, 53, 54
  Defect interaction, 276
  Equivalent network, 86, 241
  Hysteresis model, 91
  Lumped circuit equations, 242
  Macroscopic, 86
Multifrequency, 189, 204, 213, 229, 255, 269
  Advantages, 192, 265
  Analysis of nonunique signals, 200
  Defect signals, 194
  Mix effectiveness, 195
  Mixer, 193
  Mixing limitation, 198
  Multiplexing, 219
  Optimization of signal, 223
  Suppression of unwanted signals, 256
  Two frequency versus three frequency, 196
  Using absolute coil, 60
Multifrequency instrumentation, 190, 219, 236, 256, 260
Multiparameter, 189, 255, 269, 282
  Benefits, 193

N
Nonlinear metallic structure, 23
Notch, 82
Numerical methods, 11
  Algorithm for coil encircling tube, 214
  Algorithm for coil inside tube, 214
  Boundary integral equation, 303
  Finite difference, 11
  Finite element, 12
  Numerical solution, 11, 22, 48, 303

O
Optimizing test frequency, 213, 223

P
Pattern recognition, 464
  Defects for, 466
  Empirical Bayes procedure, 477
  Least squares model, 479
  Nearest neighbor, 479
Perturbation, electric current (see Flux leakage)
  Phase angle, 197, 206, 258, 281
  Phase boundary, 164
  Power loss, eddy current, 88
  Precipitation, 165
  Probe, ferromagnetic resonance, 343, 349
  Probe response, 376
  Impedance change, finite element model, 70
  Microwave and low frequency, 340
  Microwave model, 333
  Pulsed eddy currents, 367, 374, 387
  Analytical model, 369
Depth of penetration, 374
Instrumentation, 131, 367, 388
Pulse shape, 373
  Edge margin effect, 135
  Fastener height variation, 136
  Lift-off, 137
  Steel fasteners, 133
  Theoretical, 373
  Varying conductivity, 136

Theoretical zone model, 178
Solonoid
  Around cylindrical conductor, 299
  Basic equation, 300
Stability, of standards, 94
Standards
  Primary conductivity, 96
  Secondary conductivity, 97
  Tubing defect, 81
Steel elongator roll, 420
Steel fastener, effect on pulse shape, 133
Steel sheet, pulsed model, 369
Support plate, signal evaluations, 284
Surface crack, 312
  Electromagnetic field distribution, 406
  Integral equation, 336
  Two-dimensional integral model, 64
  With circular arc, 410

Tubing, multiple cylinder model, 231
Tubular welded t-joint, 415
Two-dimensional scattering, 64

U
Uniform thinning, sizing of, 481
